

# ₹ NATURE OF INDIAN ECONOMY — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

## Topics in this chapter:

1. Mixed Economy — Meaning & Indian Model
2. India as a Developing Economy — Classification & Exam Trap
3. Labour-Surplus Economy
4. Underdeveloped Economy — Core Characteristics
5. Indian Economy — Major Structural Features
6. Economic vs Non-Economic Activities
7. Determinants of Economic Development
8. Second Generation of Economic Reforms

## 1. Mixed Economy — Meaning & Indian Model

- Mixed economy ka simple matlab hai: ek hi national economy mein public sector aur private sector dono saath-saath kaam karte hain. India iska major example hai. Iska matlab agriculture aur industry ko equal importance dena, large aur cottage industries ka co-existence, ya primary-secondary sectors ka sirf saath hona nahi hai. [Q1, Q2, Q3]
- Indian economy ki basic identity Mixed Economy hai. Socialist economy mein ownership aur economic power zyada tar State ke control mein hoti hai; capitalist economy mein means of production par private ownership hoti hai aur market mein government ka role limited rehta hai. Gandhian socialist model decentralisation, self-employment, self-reliance aur cottage industries par zor deta hai. [Q5, Q6, Q7]
- Indian development model State aur individual dono ke interests ko balance karta hai: public sector ko State administer karta hai, jabki private sector ka administration individuals ke haath mein hota hai. [Q19]

## 2. India as a Developing Economy — Classification & Exam Trap

- Indian economy ko developing economy maana jaata hai. Developing economy mein development ke saath production structure, production ka nature, banne wali goods aur social relations mein lagataar badlav aata rehta hai. [Q12, Q14]
- Indian economy mixed economy bhi hai aur ismein kai underdeveloped characteristics bhi milti hain. Economics ke 'Father' Adam Smith hain, J. M. Keynes nahi. [Q4]

### EXAM TRAP — India: Underdeveloped vs Developing

- ▶ India developing economy hai, lekin ismein underdeveloped economy ki kai characteristics ek saath mil sakti hain. Dono baaton ko contradiction samajhne ki zarurat nahi hai. [Q4, Q10, Q12, Q14]
- ▶ Mixed economy hona aur underdeveloped-type traits ka milna alag concepts hain; India ke context mein dono ek saath dekhe ja sakte hain. [Q4]
- ▶ National income ki slow growth pehle zyada prominent thi; current context mein India ko developing economy ke roop mein describe karna zyada appropriate hai. [Q10]
- ▶ Yaad rakhein: 'developing economy' current overall classification hai, jabki poverty, unemployment, low per-capita income jaise underdeveloped traits alag se poochhe ja sakte hain. [Q4, Q10, Q12, Q14]

## 3. Labour-Surplus Economy

- India ko labour-surplus economy kaha jaata hai, kyunki badi population aur limited employment opportunities ke karan available labour ki matra demand se zyada ho sakti hai. [Q8]

## 4. Underdeveloped Economy — Core Characteristics

- Underdeveloped economy ki common characteristics hain: low per-capita income, low standard of living, high population growth, high unemployment/underemployment, agriculture ka dominance, low capital formation aur income inequality. Low per-capita income aur low capital formation aksar ek-doesre se jude hote hain. [Q9]
- Indian economy mein historically underdeveloped-type traits ke roop mein low per-capita income, slow income growth, heavy population pressure, poverty, agriculture par dependence, high unemployment, traditional social structure, technical skills ki kami aur low literacy jaise features dekhe gaye hain. Development planning aur plan expenditure ne in problems ko address karne mein important role nibhaya. [Q10]
- National income ki slow growth pehle Indian economy ki prominent problem thi, lekin current Indian economy ko define karte waqt ise ek standalone defining characteristic nahi maana jaata. India ko ab developing economy ke roop mein samajhna zyada sahi hai. [Q10]

## 5. Indian Economy — Major Structural Features

- Developing economy ki typical features mein agriculture ka major occupation hona, disguised unemployment aur human capital ki comparatively low quality shamil ho sakti hai. High per-capita protein intake developing economy ki typical feature nahi hai. [Q11]
- Indian economy ke broad structural features mein agriculture ka bada role, low capital formation, population pressure, unemployment, low per-capita income, industrial aur technological backwardness, mixed economy, imports par dependence aur illiteracy jaise points shamil rahe hain. [Q11]
- Agriculture ki dominance, low per-capita income aur large-scale unemployment Indian economy ke important structural traits rahe hain. Industry ki dominance developed economy se zyada judi characteristic hai. [Q13]
- Low labour efficiency, low per-capita income aur low rate of capital formation Indian economy ki important characteristics rahe hain; natural resources ki absolute kami ko Indian economy ki basic characteristic nahi maana jaata. [Q15]

## 6. Economic vs Non-Economic Activities

- Economic activity woh activity hai jisme limited resources ka use karke human wants satisfy ki jaati hain aur aam taur par income ya economic value generate hoti hai. Consumption, production, exchange, investment, product pricing aur factor pricing iske major parts hain. [Q16]
- Voluntary social service non-economic activity hai, kyunki iska main purpose income kamana nahi hota. Isi tarah religion ya patriotism se inspired voluntary work non-economic ho sakta hai; farming, transportation aur salaried job economic activities hain. [Q16]

## 7. Determinants of Economic Development

- Economic development ke major economic determinants hain: natural resources, labour force aur population, capital formation, technology aur innovation, capital-output ratio aur efficient organization. [Q17]
- Economic development ke non-economic determinants mein social, religious, political, international aur scientific factors aate hain. Social behaviour bhi development ko influence karne wala important non-economic factor hai. [Q17]

## 8. Second Generation of Economic Reforms

- Second Generation of Economic Reforms mein oil-sector reforms, public-sector reforms aur government/public institutions se jude reforms shamil kiye gaye. Judicial system reforms ko is specific reform-group ka part nahi maana gaya. [Q18]
