

AREA — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

Topics in this chapter:

1. India's World Rank by Area
2. India's Share of World Area & Population
3. Tropic of Cancer & Latitudinal Extent (Torrid Zone)
4. Standard Time Meridian
5. Total Extent, Land Boundary & States/UTs Count
6. Number of Villages in India
7. Miscellaneous Facts about India

1. India's World Rank by Area

- India duniya ka **saatvaan (7th)** sabse bada desh hai area ke hisaab se — Russia, Canada, USA, China, Brazil aur Australia ke baad. Ye rank **5th ya 6th nahi hai** — in dono wrong options ko exam mein carefully avoid karo. [Q1(stmt1), Q2(stmt1), Q3, Q4]
- Population ke hisaab se India duniya ka **dusra (2nd)** sabse zyada aabadi wala desh hai (Census 2011 ke hisab se; UNFPA 2023 projection mein sabse zyada aabadi wala bhi ban chuka hai). [Q8]

2. India's Share of World Area & Population

- India duniya ke total land area (lithosphere) ka lagbhag **2.4%** hissa cover karta hai. [Q1(stmt2), Q2(stmt2)]
- Lekin area sirf 2.4% hone ke bawajood, India ki population world population ka lagbhag **16.7% (Census 2001) — 17.5% (Census 2011)** hai. Closest exam option **17%** maana jaata hai. [Q5]

3. Tropic of Cancer & Latitudinal Extent (Torrid Zone)

- Tropic of Cancer (Karka Rekha) desh ke **beech (middle)** se guzarti hai, jo India ko do latitudinal halves mein baant deti hai. [Q1(stmt3)]
- Torrid (tropical) zone 23°30' North se South latitude tak failaa hai, jabki India **8°4' N se 37°6' N** tak failaa hai. Isliye **poora India torrid zone mein NAHI hai** — ye ek common EXAM TRAP hai (statement 'whole of India lies in torrid zone' hamesha GALAT hoga). [Q1(stmt4), Q2(stmt3)]

4. Standard Time Meridian

- Indian Standard Time (IST) **82°30' East** longitude (Mirzapur, U.P. ke paas) se determine hoti hai. [Q2(stmt4)]

5. Total Extent, Land Boundary & States/UTs Count

- India ka total area **3.28 million sq. km** (3,287,263 sq km — Census 2001) hai. Latitudinal extent **8°4' N — 37°6' N** aur longitudinal extent **68°7' E — 97°25' E** hai. [Q7]
- India mein currently **28 states aur 8 union territories** hain — **26 states NAHI** (ye ek common wrong-pair option hota hai match-the-following type questions mein). [Q7]

- India ki land boundary lagbhag **15,200 km** tak faili hui hai. [Q8]

6. Number of Villages in India

- Census 2011 ke anusaar, India mein total gaon (villages) ki sankhya **6,40,932** hai. Chunki exact figure (6.4 lakh) options mein nahi diya jaata, '**None of these**' / 'इनमें से कोई नहीं' sahi answer banta hai — is pattern ko yaad rakho. [Q6]

7. Miscellaneous Facts about India

EXAM TRAP — First Sunrise (bahut common galat option!)

- India mein sabse pehla sunrise **Arunachal Pradesh** (India ka sabse east state) mein hota hai — **Mizoram mein NAHI**. Options mein 'Mizoram' galat statement ke roop mein diya jaata hai — is trap ko carefully identify karo. [Q8]
