

EXTREME POINTS — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

Topics in this chapter:

1. The Four Extreme Points of India
2. Indira Point (Southernmost) — Details
3. Easternmost/Westernmost — City & State Comparisons
4. Kanyakumari — Where Three Water Bodies Meet

| 1. The Four Extreme Points of India

- India ke 4 extreme points: **Southernmost** — **Indira Point** ($6^{\circ}4' N$, Great Nicobar, Andaman & Nicobar), **Northernmost** — **Indira Col** (Siachen Glacier ke paas, Ladakh), **Westernmost** — **Guhar Moti / Guhar Mota** (Kutch, Gujarat), **Easternmost** — **Kibithu** (Arunachal Pradesh). Mainland (excluding islands) ka southernmost point **Kanyakumari** (Tamil Nadu, $8^{\circ}4' N$) hai. [Q1]
- State-level extreme points: **Easternmost state** — **Arunachal Pradesh**, **Westernmost state** — **Gujarat** — ye sahi pair hai (Assam-Rajasthan, Assam-Gujarat jaise options galat hote hain). [Q4]

| 2. Indira Point (Southernmost) — Details

- Indira Point, **Great Nicobar** tehsil mein located hai (Nicobar district, Andaman & Nicobar Islands) — **Chhota Nicobar ya Car Nicobar mein NAHI**. [Q2, Q3]

| 3. Easternmost/Westernmost — City & State Comparisons

- Westernmost point ka exact coordinate **$23^{\circ}7' N$, $68^{\circ}7' E$** hai (Guhar Moti, Kutch, Gujarat) — direction 'East' hi sahi hai, 'West' nahi (common confusion trap). [Q5]
- Diye gaye major cities (Hyderabad, Bhopal, Lucknow, Bangalore) mein sabse eastward city **Lucknow** ($80^{\circ}34' - 81^{\circ}12' E$) hai. [Q6]

| 4. Kanyakumari — Where Three Water Bodies Meet

- Kanyakumari (Tamil Nadu) wo jagah hai jahan **Bay of Bengal, Arabian Sea aur Indian Ocean** teeno milte hain — Indian mainland ka southernmost point bhi yahi hai. [Q7]
