

GREEN REVOLUTION — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

Topics in this chapter:

1. Green Revolution Start — 1966-67 (Sixties)
2. M.S. Swaminathan — Evergreen Revolution
3. Norman Borlaug — Global Father of Green Revolution
4. Green Revolution Definition — High-Yield Variety Programme
5. Wheat — Biggest Beneficiary Crop
6. Mexican Wheat — Main Crop Used
7. Record Wheat Yield — 2000 kg/hectare
8. Second Green Revolution — Objectives
9. Green Revolution Components (Seeds, Irrigation, Electrification, Roads)
10. Regional Disparities (Assertion-Reason)
11. Rainbow Revolution — Umbrella Concept
12. Revolution-Sector Match Set (White, Blue, Grey)
13. Pink Revolution — Onion
14. Golden/Grey/Yellow/Black Revolution Match Set
15. Blue Revolution — Fisheries (Not Poultry)
16. Zero Till Seed-cum-Fertilizer Drill — Pantnagar
17. Commercial vs Non-Commercial Crops

| 1. Green Revolution Start — 1966-67 (Sixties)

- Green Revolution **1966-67 mein shuru hui (7th decade/sixties)** — first stage **Haryana, Punjab, Western UP** mein tha, 1981 tak jaari raha. [Q1]

| 2. M.S. Swaminathan — Evergreen Revolution

- 'Evergreen Revolution' term **M.S. Swaminathan (India ke Green Revolution ke pita)** ne use kiya — **ecological harm ke bina productivity permanently badhaana** iska matlab hai. Dusri Green Revolution ke steps propose kiye: bio-fertilizers+chemical fertilizers, rainwater harvesting, agricultural economic zones. [Q2]

| 3. Norman Borlaug — Global Father of Green Revolution

- Norman Ernest Borlaug **USA se the** — Mexico mein semi-dwarf, high-yield, disease-resistant wheat develop ki, **global context mein Green Revolution ke pita** hain (India ke liye M.S. Swaminathan) — Nobel Peace Prize aur Padma Vibhushan (2006) mile. [Q3, Q4, Q5]

| 4. Green Revolution Definition — High-Yield Variety Programme

- Green Revolution ka matlab **High Yield Variety (HYV) programme** hai — high-yielding seeds, modified equipment, chemical fertilizers badhaana. 1966-67 mein Rockefeller Foundation (USA) ki madad se shuru hua. [Q6, Q7]

| 5. Wheat — Biggest Beneficiary Crop

- Green Revolution ka **sabse bada beneficiary crop** — **Wheat (production+productivity dono mein)** hai — Rice dusre number par. Independence ke baad India ne **Wheat production mein sabse zyada progress** ki. *[Q8, Q9, Q10, Q11]*

6. Mexican Wheat — Main Crop Used

- Green Revolution mein **Mexican Wheat (Borlaug ke International Maize and Wheat Improvement Center se)** main crop tha. *[Q12]*

7. Record Wheat Yield — 2000 kg/hectare

- Green Revolution ke result mein wheat yield **2000 kg/hectare (record figure, pehle se 3x)** tak pahunchi — 2023-24 mein ye **3559 kg/hectare** ho gayi hai. *[Q13]*

8. Second Green Revolution — Objectives

- Second Green Revolution ke objectives: **seed-water-fertilizer technology ko un areas tak extend karna jo pehli Green Revolution se benefit nahi hue, aur agriculture ko animal husbandry/social forestry/fishing ke saath integrate karna** — 'wheat-rice production aur badhaana' aur 'naye crops (jo pehle use nahi hue) ki yield badhaana' iske objectives **NAHI** hain. *[Q14]*

9. Green Revolution Components (Seeds, Irrigation, Electrification, Roads)

- Green Revolution ke sab 4 components sahi hain: **high-yielding seeds, irrigation, rural electrification, rural roads/marketing**. *[Q15]*

10. Regional Disparities (Assertion-Reason)

- Green Revolution ne food grain production badhaya (Assertion sahi) — **India mein regional disparities bhi badhi hain (Reason sahi)** — kyunki Revolution sirf irrigated/high-potential rain-fed areas mein failii, baaki areas peeche reh gaye — dono statements sahi hain par R, A ka explanation nahi hai. *[Q16]*

11. Rainbow Revolution — Umbrella Concept

- 28 July 2000 ko National Agricultural Policy mein **Rainbow Revolution concept introduce hua** — ye **crop cultivation, horticulture, forestry, fishery, poultry, animal husbandry, food processing ka integrated development** hai — sab alag-alag 'colour revolutions' (Green, White, Yellow, Blue, Red, Golden, Grey) ko cover karta hai. *[Q17]*

12. Revolution-Sector Match Set (White, Blue, Grey)

- Match set: **Food production growth — Green Revolution, Milk — White Revolution, Fisheries — Blue Revolution, Fertilizers — Grey Revolution**. *[Q18]*

13. Pink Revolution — Onion

- Pink Revolution **Onion (pyaaz)** se related hai — **Black — Petroleum, Red — Tomato/Meat, Blue — Fisheries, Yellow — Oilseed**. *[Q19, Q20]*

14. Golden/Grey/Yellow/Black Revolution Match Set

- Match set: **Golden Revolution — Horticulture/Honey, Grey Revolution — Fertilizers, Yellow Revolution — Oilseed Production, Black Revolution — Petroleum Production.** [Q21]

15. Blue Revolution — Fisheries (Not Poultry)

- Blue Revolution **aquaculture/pisciculture (fisheries)** se related hai — '**Blue Revolution-Poultry**' **GALAT pair hai** (aquaculture ka poultry se koi relation nahi hai). [Q22, Q23, Q24, Q25, Q26, Q27, Q29]

⚠ EXAM TRAP — Blue Revolution — Fisheries se hai, Poultry se NAHI (bahut common wrong-pair)

16. Zero Till Seed-cum-Fertilizer Drill — Pantnagar

- 'Zero Till Seed-cum-Fertilizer Drill' **G.B. Pant University, Pantnagar** ne develop ki — bina seedbed preparation ke direct paddy-harvest-ke-baad sowing enable karti hai, diesel/labour/time bachati hai. [Q28]

17. Commercial vs Non-Commercial Crops

- Commercial (cash) crops: **Sugarcane, Cotton, Banana — Bajra (millet) commercial crop NAHI hai** — commercialization ka level state-wise alag hota hai (jaise rice Haryana-Punjab mein commercial hai, Odisha mein subsistence crop hai). [Q30]
