

KHARIF CROPS — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

Topics in this chapter:

1. Rice — Origin (South-East Asia), Ideal Climate
2. Rice Cultivation Pattern (100cm Isohyet, UP Largest Area)
3. System of Rice Intensification (SRI) — Madagascar Origin
4. Kharif vs Rabi vs Zaid Classification
5. Chief Food Crop — Rice (Largest Cropped Area)
6. Largest Cropped Area — Rice (47.8M Hectares)
7. UP — Largest Rice Cultivation Area
8. Rice Bowl of India — Krishna-Godavari Delta
9. Punjab — Highest Rice Productivity (4193 kg/ha)
10. Rice Variety Identification (Jawala Not a Rice Variety)
11. Aman/Aus/Boro — Rice Season Varieties (Bengal)
12. Pusa Sugandha-5 & Barani Deep — Rice Varieties
13. Pusa RH-10 — Hybrid Basmati Variety
14. Basmati Seed Ratio — 15-20 kg/hectare
15. Punjab — Rice Exporter Despite Not Leading Producer
16. Rice Production Trends & State Rankings (Multi-Year)
17. Rice Biofertilizers — Blue-Green Algae
18. East vs West Coast Rainfall (Assertion-Reason)
19. Stagnant Cropped Area — Rice (Not Oilseeds/Pulses/Sugarcane)
20. Top-4 Rice Producers — Historical Sets
21. Surplus Rice Producer — Andhra Pradesh (Historical)
22. Rice Cultivation Rainfall Threshold — 100cm
23. UP — Largest Hybrid Rice Area
24. Zaid Crops — Moong/Urad, Fodder
25. Rice — Transplanted Crop
26. Crop-State Match — 'None' Answer Trap (Multi-Question)
27. Paddy — NOT Helpful in Nitrogen Fixation
28. Jowar — Not a Cash Crop
29. Kharif Cropped-Area Trends (Rice Highest, Cotton>Sugarcane)

1. Rice — Origin (South-East Asia), Ideal Climate

- Rice ki origin South-East Asia mein hui thi — 25°C se zyada temperature aur 100cm se zyada rainfall chahiye. [Q1, Q5]

2. Rice Cultivation Pattern (100cm Isohyet, UP Largest Area)

- Eastern/Southern states mein saal mein 2-3 rice crops hoti hain — 100cm rainfall ka isohyet rice production ki western limit decide karta hai — UP mein sabse zyada area (12.33%), Bihar ka contribution 5.99% hai. [Q2]

3. System of Rice Intensification (SRI) — Madagascar Origin

- SRI (1980s, Madagascar mein origin) mein alternate wetting-drying hoti hai — **iske fayde: kam seed requirement, kam methane production, kam electricity consumption (sab teen sahi hain).** [Q3]

4. Kharif vs Rabi vs Zaid Classification

- Kharif (June-July boyi, Sept-Oct kaati): **Rice, Millet, Cotton, Soyabean, Sugarcane, Maize, Groundnut, Red Chillies** — **Cotton, Groundnut, Rice Kharif hain (Wheat Rabi hai).** Lentil, Linseed, Mustard Rabi hain — Soyabean Kharif hai. [Q4, Q6, Q7, Q8]

5. Chief Food Crop — Rice (Largest Cropped Area)

- Rice India ki chief food crop hai (Wheat dusre number par). [Q9]

6. Largest Cropped Area — Rice (47.8M Hectares)

- Economic Survey 2024-25 ke mutabik **Rice sabse bada cropped area (47.8 million hectares) rakhta hai — Wheat 31.8 million hectares.** [Q10]

7. UP — Largest Rice Cultivation Area

- 2022-23 data ke mutabik **UP mein rice cultivation ka sabse bada area (5.90 million hectares) hai** — per-hectare average production 2013-14 mein 2416 kg tha, 2023-24 mein 2882 kg/hectare ho gaya. [Q11, Q12]

8. Rice Bowl of India — Krishna-Godavari Delta

- 'Rice Bowl of India' **Krishna-Godavari delta region hai (Andhra Pradesh)** — Rayalseema is delta region par extend hota hai. [Q13]

9. Punjab — Highest Rice Productivity (4193 kg/ha)

- 2022-23 ke mutabik **Punjab mein rice ki sabse zyada productivity (4193 kg/hectare) hai.** [Q14, Q34, Q35]

10. Rice Variety Identification (Jawala Not a Rice Variety)

- Rice varieties: **Jamuna, Karuna, Jaya, Kanchi, Jagannath, Krishna, Kaveri, Hansa, Vijaya, Padma, Annapurna, Bala, Ratna** — **'Jawala' rice ki variety NAHI hai** — Jaya, Padma, Krishna teeno rice ki improved varieties hain. [Q15, Q16, Q17]

11. Aman/Aus/Boro — Rice Season Varieties (Bengal)

- Bengal rice categories: **Aman (June-July boyi, Nov-Dec kaati, winter crop), Aus/Kar (May-June boyi, Sept-Oct kaati, autumn crop), Boro/Dalua (Nov-Dec boyi, Mar-Apr kaati, summer crop).** [Q18]

12. Pusa Sugandha-5 & Barani Deep — Rice Varieties

- Pusa Sugandha-5 (aromatic variety), Barani Deep, Narendra Sankar, Narendra Shuska Samrat, Lalmati **sab rice ki varieties hain.** [Q19, Q20]

13. Pusa RH-10 — Hybrid Basmati Variety

- Pusa RH-10 **Basmati Rice** ki hybrid variety hai (PHB-71, Ganga, Suruchi, KRH-2, Sahyadri-4 bhi hybrid varieties hain). [Q21]

14. Basmati Seed Ratio — 15-20 kg/hectare

- Basmati rice transplanting ke liye **proper seed ratio 15-20 kg/hectare** hai. [Q22]

15. Punjab — Rice Exporter Despite Not Leading Producer

- Question ke waqt **Punjab rice ka major exporter tha lekin production mein leading NAHI tha** (Assertion sahi, Reason galat) — 2023-24 mein Telangana leading producer, UP dusre, WB teesre number par. [Q23]

16. Rice Production Trends & State Rankings (Multi-Year)

- West Bengal ab teesra sabse bada rice producer hai (2023-24 data) — pehle question mein Assertion sahi, Reason galat tha, ab data ke mutabik alag ho sakta hai. **Current top-3: Telangana, UP, WB** (jab pehle poocha gaya tab AP/WB/Punjab/UP top-4 the). [Q24, Q28, Q29, Q33, Q40, Q41]

17. Rice Biofertilizers — Blue-Green Algae

- Rice crop ke liye biofertilizer: **Blue-green algae** (Azospirillum, Phosphobacteria, Azolla bhi use hote hain). [Q25]

18. East vs West Coast Rainfall (Assertion-Reason)

- East coast west coast se zyada rice produce karta hai (Assertion sahi) — **lekin East coast mein zyada rainfall hone ka Reason GALAT hai** (asal mein West coast mein zyada rainfall hoti hai, narrow coast aur high mountains ki wajah se). [Q26]

⚠ EXAM TRAP — West coast mein actually zyada rainfall hoti hai (East coast mein NAHI) — par East coast mein zyada rice production hota hai apni suitable climate-soil ki wajah se

19. Stagnant Cropped Area — Rice (Not Oilseeds/Pulses/Sugarcane)

- Pichhle dashak mein **Rice ka cropped area kamobesh stagnant** raha hai (42.9→45.8→47.8 million hectares) — Oilseed, Pulses, Sugarcane ka area badha hai. [Q27]

20. Top-4 Rice Producers — Historical Sets

- Historically top-4 rice producers **West Bengal, Uttar Pradesh, Punjab, Andhra Pradesh** the — India ki 50%+ total rice production. [Q28]

21. Surplus Rice Producer — Andhra Pradesh (Historical)

- 2008-09 data ke mutabik **Andhra Pradesh ka market surplus ratio sabse zyada tha** — 2014-15 mein Punjab pehle number par aa gaya (Haryana dusre). [Q30]

22. Rice Cultivation Rainfall Threshold — 100cm

- Rice cultivation **100cm se zyada annual rainfall wale areas mein hoti hai** — kam-rainfall areas mein irrigation ki madad leni padti hai. [Q31]

23. UP — Largest Hybrid Rice Area

- Hybrid rice cultivation ke liye **Uttar Pradesh ka sabse bada area hai**. [Q32]

24. Zaid Crops — Moong/Urad, Fodder

- Zaid season (irrigated areas) mein main crops: **Moong aur Urad — Fodder bhi Zaid crop hai** (Gram/Mustard Rabi, Cotton Kharif hai). [Q36, Q37]

25. Rice — Transplanted Crop

- Paddy crop transplant ki jaati hai (weed-control ke liye, kam seed par zyada labour chahiye, transplant-shock se pakne mein zyada waqt lagta hai). [Q38]

26. Crop-State Match — 'None' Answer Trap (Multi-Question)

- Kayi crop-state match questions mein **data change hone ki wajah se 'None of the above' hi sahi answer banta hai** (jaise Rice-WB, Wheat-UP, Cotton-Gujarat, Mustard-Rajasthan combo) — actual current leaders alag hain (Rice mein Telangana ab leading hai). [Q39]

27. Paddy — NOT Helpful in Nitrogen Fixation

- Gram, Pea, Bean nitrogen-fixation mein madad karte hain — **Paddy (dhan) is process mein sahayak NAHI hai**. [Q42]

28. Jowar — Not a Cash Crop

- Jute, Groundnut, Sugarcane cash crops hain — **Jowar cash crop NAHI hai**. [Q43]

29. Kharif Cropped-Area Trends (Rice Highest, Cotton>Sugarcane)

- Pichhle 5 saalon mein: **Rice ka cropped area sabse zyada hai, Cotton ka area Sugarcane se zyada hai — 'Jowar ka area Oilseed se zyada' aur 'Sugarcane area lagatar ghat raha' GALAT statements hain**. [Q44]
