

COTTON — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

Topics in this chapter:

1. Climate Requirements — Subtropical, Frost-Free
2. Kharif Crop — Temperature & Rainfall Range
3. Millet Crops Group (Cross Reference)
4. Cotton Belt — North-Western & Western India
5. Largest Producer — Gujarat
6. 'White Gold' — MP & Maharashtra Districts
7. India — Original Home of Cotton Plant
8. Cotton Fibers — Seed Hairs
9. Cotton vs Sugarcane Competition (Maharashtra)
10. Highest Yield & Most Textile Mills (Disputed)

| 1. Climate Requirements — Subtropical, Frost-Free

- Cotton crop subtropical hai, hard frost ke liye harmful hai — 210 frost-free days aur 50-100cm rainfall chahiye. Light well-drained soil (moisture-retentive) ideal hai. [Q1]

| 2. Kharif Crop — Temperature & Rainfall Range

- Cotton mainly Kharif season ka cash crop hai — ideal temp 21-27°C (15°C se kam ya 43°C se zyada nahi sehta), moderate rainfall 50-75cm (kuch sources 70-120cm bhi batate hain). [Q2]

| 3. Millet Crops Group (Cross Reference)

- Millet crops group: Sorghum (jowar), Kodo, Kangani, Ragi — Maize aur Moong millets NAHI hain (ye cotton se related nahi hai, par isi chapter mein tha). [Q3]

| 4. Cotton Belt — North-Western & Western India

- India mein cotton ka sabse zyada production North-Western aur Western India mein hota hai (Gujarat, Maharashtra) — 2023-24 mein 12.7 million hectare area mein cultivation. [Q4]

| 5. Largest Producer — Gujarat

- 2023-24 data ke mutabik Gujarat > Maharashtra > Telangana cotton production ke top-3 states hain. [Q5]

| 6. 'White Gold' — MP & Maharashtra Districts

- 'White Gold' cotton ko kaha jaata hai — MP mein Khandwa-Khargone districts is naam se famous hain, aur Maharashtra mein bhi cotton ko 'White Gold' kaha jaata hai (black soil se cultivation hoti hai). [Q6, Q7]

| 7. India — Original Home of Cotton Plant

- India cotton plant ka **original home** hai (Rigveda, Manusmriti mein mention) — **India** hi duniya ka pehla desh hai jisne commercial hybrid cotton variety (H-4, 1970) develop ki. [Q8]

8. Cotton Fibers — Seed Hairs

- Cotton fibers **seed hairs** hain — cotton plant ke seeds ki surface se milte hain. [Q9]

9. Cotton vs Sugarcane Competition (Maharashtra)

- Maharashtra ki black soil mein cotton ko sugarcane se competition milti hai kyunki **irrigation ka expansion** is region ko sugarcane cultivation ke liye zyada suitable bana deta hai (jo cotton se zyada profitable crop hai). [Q10]

10. Highest Yield & Most Textile Mills (Disputed)

- Cotton yield (productivity) mein Gujarat sabse aage hai (options mein na hone par 'None of the above' sahi answer) — cotton textile mills ki sankhya mein Tamil Nadu sabse aage hai (options mein na hone par 'None' sahi). [Q11, Q12]
