

ISLAND GROUPS OF THE BAY OF BENGAL — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

Topics in this chapter:

1. Saddle Peak — Highest Peak of Andaman
2. Andaman & Nicobar — Basic Facts & Island Count
3. Ten Degree Channel
4. Barren Island — India's Only Active Volcano
5. Sriharikota — Space Centre Island
6. Adam's Bridge (Ram Setu)
7. Great Nicobar — Nearest Foreign Landmass

1. Saddle Peak — Highest Peak of Andaman

- 'Saddle Peak' (732m) Andaman-Nicobar ki **sabse ooncha peak** hai — **North Andaman (Diglipur ke paas)** mein located. [Q1, Q2]

2. Andaman & Nicobar — Basic Facts & Island Count

- Andaman aur Nicobar **do alag islands NAHI** balki **Bay of Bengal mein ek group of islands** hai. Total islands (islands/islets/rock outcrops) ki sankhya **836** hai — options mein diye jaane wale 200/220/240/250 sab galat approximations hain (disputed question). [Q3, Q4]

3. Ten Degree Channel

- Ten Degree Channel **Andaman aur Nicobar islands** ko separate karta hai — width ~150km, naam 10° North latitude ke parallel hone ki wajah se pada hai. (Lakshadweep-Minicoy, South-Little Andaman jaise options isse related NAHI hain — common confusion trap). [Q5, Q6, Q7]

4. Barren Island — India's Only Active Volcano

- Barren Island **South Asia ka ekmatra confirmed active volcano** hai — **Bay of Bengal (Andaman Sea) mein, Port Blair se ~135km northeast** (Great Nicobar se 540km, NOT 140km — common wrong-statement). Pehla recorded eruption **1787** mein hua tha, phir 1991 (6 mahine tak chala), aur uske baad 1994-95 aur 2005-06 mein bhi eruptions hue (2005-06 wala 2004 Indian Ocean earthquake se linked maana jaata hai) — isliye 'sirf 1991 ke baad se inactive hai' wala statement **GALAT** hai. [Q8, Q9, Q10, Q11]

EXAM TRAP — Barren Island — Great Nicobar se distance 140km NAHI, 540km hai; 1991 ke baad bhi eruptions hue hain

5. Sriharikota — Space Centre Island

- Sriharikota island (Andhra Pradesh) **Pulicat Lake ke paas** hai — isse Bay of Bengal se separate karta hai. Yahan **Satish Dhawan Space Centre** located hai. [Q12]

6. Adam's Bridge (Ram Setu)

- Adam's Bridge (aka **Ram Setu**) India ke **Dhanushkodi (Pamban island)** se shuru hoke **Sri Lanka ke Mannar island tak** shoals ki chain ke roop mein failaa hai. Pamban island 2.2km lambe Pamban Bridge se Indian mainland se semi-connected hai. *[Q13]*

7. Great Nicobar — Nearest Foreign Landmass

- Great Nicobar (India ka sabse southern island, $6^{\circ}45' - 7^{\circ}15' \text{ N}$, $93^{\circ}37' - 93^{\circ}56' \text{ E}$) ke geographically sabse kareeb **Sumatra (Indonesia)** hai — Borneo, Java, Sri Lanka se zyada close. Java, Sumatra ke south mein hai; Borneo, Sumatra ke east mein hai. *[Q14]*
