

THE SOUTH INDIAN RIVERS — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

Topics in this chapter:

1. West-Flowing Peninsular Rivers — Why No Delta (Rift Valley)
2. Narmada — Origin, Course & Basin Districts
3. Son River — Origin Dispute (Amarkantak vs Sonmuda)
4. Tapi/Tapti — Origin, Course & Purna Tributary
5. Cauvery — Origin, Islands & 'Ganga of the South'
6. Krishna River — Origin & Interstate Dispute
7. River Length Rankings (Godavari > Krishna > Narmada > Mahanadi)
8. River Linking Project & West-Flowing Trio
9. North-to-South Sequence of East-Flowing Rivers
10. Estuary-Forming Rivers vs Delta-Forming Rivers
11. Catchment Area & Basin Size Comparisons
12. Mahanadi — Origin, Course & Tributaries
13. Godavari — 'Dakshin Ganga', Basin & Tributaries
14. Chambal & Rift-Valley Tributaries (Yamuna System)
15. Subarnarekha & Chotanagpur Rivers
16. Chhattisgarh Regional Rivers — Origin Match Pairs
17. Physiographic Division (S.P. Chatterjee)
18. Cross-Reference — Khartoum, Sudan (Nile Confluence)
19. South Indian Rivers — Dendritic Drainage Pattern

1. West-Flowing Peninsular Rivers — Why No Delta (Rift Valley)

- Western Ghats se nikalne wali rivers **delta NAHI banati** kyunki wo **kathor chattanon (hard rocks)** par **short course mein high speed se behti hain** (Assertion-Reason dono sahi hain, R sahi explanation hai). [Q1]
- Peninsular India ki zyadatar major rivers **Bay of Bengal** mein girti hain — sirf **Narmada aur Tapi Arabian Sea** mein girti hain, kyunki ye dono **rift valley** mein behti hain (plateau ke slope ko follow nahi karti). [Q2]

 **EXAM TRAP — Narmada west kyun behti hai — 3 reasons diye jaate hain par options mein combo trap hota hai**

- Narmada west kyun behti hai (jabki baaki peninsular rivers east): **linear rift valley mein behti hai, Vindhya-Satpura ke beech behti hai** — teesra reason 'Central India se land ka west slope' bhi diya jaata hai, lekin options mein combination trap ki wajah se disputed question ban jaata hai. [Q3]

2. Narmada — Origin, Course & Basin Districts

- Narmada Valley **Satpura aur Vindhya** ranges ke beech hai — **rift valley / fault trough ka classic example** hai (Fault Scarp, Nappe, Horst NAHI). Narmada river **Amarkantak (Maikal range, M.P.)** se nikalti hai, **structural origin** ki hai (volcanic/wind/glacial NAHI), aur ek **fault banate hue** behti hai — isliye delta nahi banati, estuary banati hai. [Q4, Q5, Q6, Q7, Q8, Q9, Q10, Q11]

- Narmada basin ka hissa: **Rajnandgaon (Chhattisgarh) — 5.68% area** — Raipur, Korba, Bastar is basin ka hissa NAHI hain. Basin zyadatar **Maharashtra, Chhattisgarh, M.P., Gujarat** mein failaa hai. [Q18]
- Narmada aur Tapti dono milkar **India ka sabse bada estuary** banati hain (world ka sabse bada St. Lawrence River banata hai). [Q46]

3. Son River — Origin Dispute (Amarkantak vs Sonmuda)

- Son aur Narmada dono **Amarkantak Hill** se nikalti hain — Son **north ki taraf** behke Ganga se milti hai (Bay of Bengal ki taraf), Narmada **west ki taraf** behke Arabian Sea mein girti hai. Mahanadi ka source **Sihawa Hills, Dhamtari (Chhattisgarh, Maikal range ka hissa)** hai. [Q19, Q20, Q21, Q51]

⚠ EXAM TRAP — Son river ka origin dispute — Sonmuda (Anuppur, M.P.) vs Amarkantak (Maikal, Chhattisgarh) — exam ke state ke hisaab se answer decide hota hai

- Son ke actual source par M.P. aur Chhattisgarh dono claim karte hain — **M.P.-based exam mein Sonmuda (Anuppur), standard/historical questions mein Amarkantak** sahi maana jaata hai. [Q22]

4. Tapi/Tapti — Origin, Course & Purna Tributary

- Tapi river **rift valley mein behti hai** (Krishna, Mahanadi, Godavari, Cauvery mein NAHI) — **Multai (Betul district, Satpura Range, M.P.)** se nikalti hai, **Maharashtra, M.P., Gujarat** se hoke **Gulf of Khambhat (Arabian Sea)** mein girti hai, length **~724 km** — India ki **dusri sabse badi westward-flowing river** hai. [Q13, Q14, Q15, Q17, Q25, Q27]
- Purna river, Tapi ki **sabse badi tributary** hai. [Q26]
- Westward-flowing rivers: **Narmada, Tapti, Mahi** — **Rapti NAHI** (Rapti Ghaghara ki tributary hai, NW-SE direction mein behti hai). [Q23, Q24]

5. Cauvery — Origin, Islands & 'Ganga of the South'

- Cauvery ko **'Ganga of the South'** kaha jaata hai — **Brahmagiri Hills (Talakaveri, Kodagu district, Karnataka, Western Ghats)** se nikalti hai, **Karnataka, Kerala, Tamil Nadu, Puducherry** se hoke behti hai, length **~800 km**. Godavari ko 'Vridhdha Ganga' ya 'Dakshin Ganga' kaha jaata hai. [Q29, Q30, Q32]
- Cauvery teen baar do dhaaron mein bat jaati hai aur kuch mile aage phir mil jaati hai — isse **Srirangapatnam, Sivasamudram, Srirangam islands** bante hain (Deccan Plateau mein). [Q28]
- Kabini (Kapila) river **Cauvery ki major tributary** hai — Kerala ke Wayanad se nikalti hai, Karnataka ke Tirumakudalu Narsipur mein Cauvery se milti hai. [Q36]
- Sahi origin-pairs: **Cauvery — Brahmagiri Hills, Sabarmati — Mewad Hills, Tapti — Satpura Range, Damodar — Chota Nagpur Plateau**. [Q31]

6. Krishna River — Origin & Interstate Dispute

- Krishna river **Mahabaleshwar (Western Ghats)** ke paas se **~1337m elevation** par nikalti hai, Arabian Sea se sirf 64km door, phir bhi length **~1400 km** tak behke **Bay of Bengal** mein girti hai. [Q41]
- Krishna river dispute **Andhra Pradesh (ab Telangana bhi), Karnataka aur Maharashtra** ke beech hai — 1957 se chal raha hai, Justice Bachawat aur Brijesh Kumar ke tribunals bane the. [Q33]

7. River Length Rankings (Godavari > Krishna > Narmada > Mahanadi)

- Peninsular rivers ki descending length order: **Godavari (1465 km) > Krishna (1400 km) > Narmada (1312 km) > Cauvery (800 km) > Tapti (724 km) > Mahanadi (851 km — Krishna-Narmada se chhoti hai par Tapti-Cauvery se badi)**. Note: exam options mein Mahanadi kabhi Krishna se pehle nahi aati, hamesha Narmada ke baad. [Q34, Q35, Q37, Q38]

8. River Linking Project & West-Flowing Trio

- Recent river-linking project: **Godavari aur Krishna rivers 16 September 2015 ko link hui** — River Linking Project ke tahat **16 links peninsular rivers ke liye, 14 links Himalayan rivers ke liye** proposed hain. [Q39]

9. North-to-South Sequence of East-Flowing Rivers

- Peninsular India ki east-flowing rivers north-se-south order: **Subarnarekha → Mahanadi → Godavari → Krishna → Pennar → Cauvery → Vaigai**. [Q40]
- Kerala mein **3 east-flowing rivers hain (Kabini, Bhavani, Pambar)** — 'Kerala mein koi east-flowing river nahi' statement GALAT hai. Isi tarah M.P. mein bhi **west-flowing rivers hain (Tapti, Mahi, Narmada)** — 'M.P. mein koi west-flowing river nahi' bhi GALAT hai. [Q52]

10. Estuary-Forming Rivers vs Delta-Forming Rivers

- Delta NAHI banane wali rivers: **Narmada aur Tapti (estuary banati hain)** — Mahanadi, Godavari, Cauvery, Krishna sab **delta banate hain**. Mandavi bhi delta-family river hai (Q45 mein Mahanadi hi answer, kyunki delta NAHI banane wali sirf Mahanadi thi us list mein — dhyan rahe, context se list badalta hai). [Q9, Q12, Q45]
- Narmada, Indus, Tapti — teeno **Arabian Sea mein girti hain** (Mahanadi Bay of Bengal mein) — isliye Mahanadi 'different' hai is set mein; Indus ka origin bhi India ke bahar hai (ye ek dusra angle hai). [Q44]
- Saabarmati aur Tapti ke ghaaton (quays) mein **paani ki kami** hoti hai (Krishna, Cauvery mein NAHI). [Q50]

11. Catchment Area & Basin Size Comparisons

- Catchment area comparison: **Godavari (3,12,812 sq km) sabse zyada** — Krishna (2,58,948), Mahanadi (1,41,589), Narmada (98,796), Cauvery (81,155), Tapti (65,145) se zyada. **Godavari basin, Ganga ke baad dusra sabse bada basin hai** (~9.50% of India's geographical area). [Q53, Q54, Q55]

12. Mahanadi — Origin, Course & Tributaries

- Mahanadi **Sihawa Hills (Dhamtari, Chhattisgarh)** se nikalti hai, Chhattisgarh-Odisha se hoke **Paradeep ke paas Bay of Bengal** mein delta banati hai — length ~851 km. **Tel river isski main tributary** hai (Seonath, Jonk, Hasdo, Mand, Ib, Ong bhi tributaries hain). [Q43, Q47, Q48]
- Left-bank tributaries: **Seonath (Shivnath), Hasdeo, Mand, Ebb**. Right-bank tributaries: **Ong, Tel, Jonk**. [Q49]

13. Godavari — 'Dakshin Ganga', Basin & Tributaries

- Godavari **Trimbakeshwar (Nasik district, Maharashtra)** se nikalti hai — **Peninsular India ki sabse lambi river (1465 km), India mein Ganga ke baad dusri sabse lambi** — Bay of Bengal mein girti hai. [Q37, Q56, Q58, Q59]
- Godavari ki main tributaries: **Pravara, Purna, Manjra, Penganga, Wardha, Wainganga, Pranhita (Wainganga+Penganga+Wardha ka combined flow), Indravati, Maner, Sabri** — **Vansadhara aur Pennar Godavari ki tributaries NAHI hain.** [Q60, Q61]
- Vaitarna river **Trimbak Hills (Nasik)** se nikalti hai — Mumbai ke north, Tapi ke south wale region mein, ~171km behke Arabian Sea mein girti hai (Godavari se related NAHI, alag independent river hai). [Q57]

14. Chambal & Rift-Valley Tributaries (Yamuna System)

- Chambal river **Malwa Plateau (Dr. Ambedkar Nagar/Mhow, M.P.)** se nikalti hai — apne '**Chambal Ravines**' (bade bade beehad) ke liye famous hai (Narmada/Son/Tapti ki valley is feature ke liye NAHI jaani jaati). [Q62]
- Tawa river **Narmada ki sabse lambi tributary** hai — Mahadeo Hills (Satpura range, Chhindwara, M.P.) se nikalti hai, Bandra Bhan (Narmadapuram) mein Narmada se milti hai. [Q68]

15. Subarnarekha & Chotanagpur Rivers

- Subarnarekha river **Nagri village (Ranchi district, Jharkhand)** se nikalti hai — main tributaries **Kanchi, Kharkai, Karkari.** [Q64]
- Eastern Ghats se nikalne wali rivers: **Nagavali aur Vamsadhara** — **Brahmani aur Subarnarekha, Ranchi Plateau se nikalti hain (Eastern Ghats se NAHI).** [Q63]
- Tropic of Cancer ko Chhota Nagpur Plateau mein **Suwarnarekha do baar cross karti hai (23°18'N se nikalti hai)** — **North Koel ek baar, South Koel kabhi nahi, Damodar sirf West Bengal mein ek baar cross karti hai** (isliye ye question disputed hai — koi bhi diya gaya option pair sahi nahi). [Q65]

16. Chhattisgarh Regional Rivers — Origin Match Pairs

- Malger river **Bailadila Hills** se nikalti hai, Shabri river se milti hai. [Q66]
- Chhattisgarh region ke river-origin match pairs: **Mand — Mainpat, Banas — Devgarh Hills, Jonk — Sunabera/Sonbera Plateau, Kelo — Ludeng Hills.** [Q67]
- Chandrasini Devi Temple (Maa Durga ka Siddha Shakti Peeth) **Mand aur Mahanadi ke sangam** (Chandrapur, Chhattisgarh) par sthit hai. [Q69]

17. Physiographic Division (S.P. Chatterjee)

- S.P. Chatterjee ne Peninsular region ko **8 parts** mein baanta: North Central Highlands, South Central Highlands, Eastern Plateau, Meghalaya Plateau, North Deccan, South Deccan, Western Ghats/Sahyadri, Eastern Ghats. **Mahanadi Basin 'North Deccan' (Maharashtra Plateau) sub-division** mein shamil hai — jisme Chhattisgarh Plains, Garjat Hills, Dandakaranya bhi aate hain. [Q70]

18. Cross-Reference — Khartoum, Sudan (Nile Confluence)

- Dublin-Ireland, Ottawa-Canada, Naypyidaw-Myanmar sahi hain — '**Khartoum-Ethiopia**' **GALAT** hai (**Khartoum Sudan ki capital hai — White Nile aur Blue Nile ka sangam yahin hota hai**). [Q16]

 **EXAM TRAP — Khartoum — Sudan ki capital hai, Ethiopia ki NAHI (Ethiopia ki capital Addis Ababa hai)**

19. South Indian Rivers — Dendritic Drainage Pattern

- South India ki rivers mein mainly **Dendritic drainage pattern** hota hai — ped ki shakhaon jaisa dikhta hai (Radial, Intermittent, Trellis se alag). [Q42]
