

OTHER RIVERS — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

Topics in this chapter:

1. Himalayan vs Peninsular Rivers — Comparison
2. Indus River System — Tributary Confluence Order
3. Chandra-Bhaga (Lahaul Valley) & Trans-Himalayan Rivers
4. Sutlej — Trans-Himalayan River & Tributaries
5. Rivers of Himachal Pradesh & Punjab Doabs
6. North-South River Sequences (Map-Based)
7. Damodar River — Origin, Tributaries & Pollution
8. Kosi — 'Sorrow of Bihar', Course-Shifting River
9. Luni & Inland Drainage Rivers
10. Ladakh Rivers — Shyok, Zaskar, Spiti Sequence
11. Bihar Canals & River-Linking Projects
12. Betwa & Rajghat/Ken-Betwa Projects
13. River-Tributary Match Sets (Repeated Pattern)
14. Kali River & Deccan Plateau Slope (Assertion-Reason)
15. Notable Bridges on Indian Rivers
16. Rivers Not Originating in India (Sutlej)
17. North-East Tributaries (Kopili, Sankosh)
18. South Indian River Tributary Match Sets
19. Superimposed Rivers (Chambal, Son)
20. West-Flowing Rivers — Mahi, Purna & Others
21. Mumbai's Mithi River
22. River Source-Region Match Sets
23. Fault Valley Drainage — Damodar
24. Gandikota Canyon — Pennar River
25. River Origin-Place Match Sets
26. Lakes Fed by Rivers — True/False Statements

| 1. Himalayan vs Peninsular Rivers — Comparison

- Himalayan rivers **perennial hoti hain (glaciers se nikalti hain)**, **gradient steep hota hai** — isliye zyada erosion aur sediment transport karti hain. Peninsular rivers **rain-fed hoti hain, gradient kam steep hai, purani (already-eroded) topography par behti hain** — isliye kam erosion karti hain (teeno statements sahi hain is comparison mein). [Q1]

| 2. Indus River System — Tributary Confluence Order

- Indus system mein confluence order: **Ravi aur Jhelum, Chenab mein milti hain → Chenab, Sutlej mein milti hai → Sutlej seedhe Indus mein milti hai**. Attock (Pakistan) mein **Kabul River** (Afghanistan se) Indus mein girti hai — Khyber Pakhtunkhwa aur eastern Afghanistan ki principal river hai. [Q2, Q3]

| 3. Chandra-Bhaga (Lahaul Valley) & Trans-Himalayan Rivers

- Chandra aur Bhaga rivers **Lahaul Valley** mein behti hain — Chandra, Chandra Tal glacier se aur Bhaga, Bara Lacha La se nikalti hai; Tandi ke paas milkar **Chandrabhaga/Chenab river** bana deti hain. [Q4]

4. Sutlej — Trans-Himalayan River & Tributaries

- Sutlej (Satluj) **Rakas Lake (Tibet)** se nikalti hai — poori Himalaya ranges ko **cut karti hai (Trans-Himalayan river)**, Shipki La ke paas Himachal Pradesh mein pravesch karti hai, length ~1500km. **Baspa, Spiti, Beas** iski tributaries hain — **Ravi Chenab ki tributary hai (Sutlej ki NAHI, sirf sub-tributary hai)**. [Q5, Q6, Q7]

5. Rivers of Himachal Pradesh & Punjab Doabs

- Himachal Pradesh se guzarne wali main rivers: **Beas, Chenab, Ravi, Sutlej, Yamuna**. Punjab ke Doab (do rivers ke beech ki zameen): **Bist Doab — Beas-Sutlej, Bari Doab — Ravi-Beas, Rachna Doab — Ravi-Chenab, Chaj Doab — Chenab-Jhelum**. [Q13, Q15]
- Doodh-Ganga river **J&K aur Uttarakhand dono mein hai** (Karnataka-Maharashtra mein bhi hai) — disputed question, UPPSC ne J&K ko sahi maana. [Q8]

6. North-South River Sequences (Map-Based)

- North-south sequence (Kishan Ganga se Pen Ganga tak): **Kishan Ganga (sabse north, Jhelum ki tributary) → Ganga → Wain Ganga (Godavari ki tributary) → Pen Ganga (Wardha ki tributary)**. [Q12]
- Drainage-map labeling (typical): **Kosi, Gomati, Ghaghara, Gandak** is order mein 1-2-3-4 label kiye jaate hain. [Q14]

7. Damodar River — Origin, Tributaries & Pollution

- Damodar, Koel aur Subarnarekha **Chotanagpur Plateau** (Khamarpat Hill) se nikalti hain — Damodar **Hooghly river ki tributary** hai, iski apni tributaries **Barki, Jamunia, Barakar** hain (Indrawati Godavari ki tributary hai, Damodar ki NAHI). **Edon Canal** Damodar se nikaali gayi hai. [Q16, Q17, Q18, Q20, Q21]
- Damodar, Son, Mahanadi, Godavari ki valleys mein India ka **90%+ coal reserve** hai. **Damodar India ki sabse polluted river** hai (Giridih-Durgapur ke beech). Rajarappa **Damodar-Bhera confluence** par hai. Damodar mein **down-warping ki wajah se rift valley** hai — isi liye ye **fault valley drainage** ke liye famous hai, aur '**Sorrow of Bengal**' bhi kehlati hai. [Q19, Q22, Q23, Q25, Q59]

8. Kosi — 'Sorrow of Bihar', Course-Shifting River

- Kosi river '**Sorrow of Bihar**' kehlati hai — apni **dangerous floods aur maximum course-shifting** ke liye jaani jaati hai (2008 mein bhi apna course badla tha). Length ~720km, Katihar ke paas Ganga se milti hai. Kosi ki **7 tributaries hain, Arun sabse important**, aur **iska source glacier mein NAHI hai** (Tibet-Nepal ke slopes drain karti hai). [Q30, Q31, Q32, Q33, Q35]

9. Luni & Inland Drainage Rivers

- Luni river **Aravalli (Ajmer ke southwest, Pushkar Valley)** se nikalti hai — **Rann of Kutch ki marshy land mein lupt ho jaati hai** (511km behke), samudra tak NAHI pahunchti — isliye '**land-bounded**' river hai. Inland drainage ke examples: **Ghaggar, Luni, Rupen**. [Q26, Q27, Q28, Q29]

10. Ladakh Rivers — Shyok, Zaskar, Spiti Sequence

- North-se-south sequence: **Shyok** ('River of Death', Karakoram) → **Zaskar** (deep gorge, **Nimu mein Indus se milti hai**) → **Spiti** (Kunzum Pass se) → **Sutlej** (Namgia ke paas Spiti se milti hai). [Q38]

11. Bihar Canals & River-Linking Projects

- Hizla fair (Dumka, Santhal Pargana) **Mayurakshi river** ke tat par hota hai. **Triveni Canal** (West Champaran) **Gandak river** se paani leti hai. [Q36, Q37, Q39]
- India ki **pehli river-linking MoU project** — **Ken-Betwa Link (25 August 2005)** — U.P. aur M.P. ke beech signed hui thi. [Q40]

12. Betwa & Rajghat/Ken-Betwa Projects

- Rajghat River Valley Project (U.P.-M.P. joint) aur **Rajghat Dam** dono **Betwa river** par hain — Lalitpur (U.P.) se 22km door. [Q41, Q42]

13. River-Tributary Match Sets (Repeated Pattern)

- Common match-set 1: **Ganga** — **Son**, **Godavari** — **Manjra**, **Krishna** — **Bhima**, **Yamuna** — **Ken**.
Common match-set 2: **Krishna** — **Bhima**, **Brahmaputra** — **Tista**, **Godavari** — **Indravati**, **Yamuna** — **Chambal**. [Q43, Q49, Q50]
- Repeated set 3: **Rapti** — **Ghaghra**, **Tista** — **Brahmaputra**, **Hiran** — **Narmada**, **Purna** — **Godavari** (Purna, Tapti ki bhi tributary hai, west-flowing river hai Gujarat-Maharashtra mein). [Q51]
- Betwa-Kshipra-Wain Ganga-Tawa set: **Betwa** — **Yamuna**, **Kshipra** — **Chambal**, **Wain Ganga** — **Godavari**, **Tawa** — **Narmada**. [Q62]

14. Kali River & Deccan Plateau Slope (Assertion-Reason)

- Kali river (Karnataka, Uttara Kannada) **west ki taraf behti hai** (Arabian Sea mein), **east ki taraf NAHI** — isliye Assertion galat hai. Lekin **Deccan Plateau ka eastern edge Bay of Bengal ki taraf slope karta hai** — ye Reason sahi hai (par Assertion ko explain nahi karta kyunki Assertion khud galat hai). [Q44]

15. Notable Bridges on Indian Rivers

- Duniya ka **sabse ooncha Arch Bridge** **Chenab river** par ban raha hai (under construction) — overall sabse ooncha bridge (sab categories) **Duge Bridge, China** hai. **Mahatma Gandhi Setu** (Ganga par, **Patna-Hajipur, Bihar**) length 5575m, 1982 mein inaugurate hua tha. [Q45, Q46]

16. Rivers Not Originating in India (Sutlej)

- Beas, Chenab, Ravi India mein originate karti hain — **Sutlej NAHI** (Tibet ke Rakastal lake se nikalti hai). [Q47]

17. North-East Tributaries (Kopili, Sankosh)

- Kopili (Kapili) river **Brahmaputra** ki tributary hai. **Sankosh river** (Bhutan mein '**Puna Tsang Chhu**' naam se) Assam aur West Bengal ke beech boundary banati hai. [Q48, Q54]

18. South Indian River Tributary Match Sets

- Bay of Bengal mein girne wali drainage systems: **Ganga, Brahmaputra, Godavari, Mahanadi, Krishna, Cauvery, Pennar, Subarnarekha, Brahmani** — Narmada, Tapti, Sabarmati, Mahi, Luni Arabian Sea mein girti hain. [Q9]
- Krishna river ki tributaries: **Koyna, Yerla, Varna, Panch Ganga, Ghataprabha, Bhima, Tungabhadra, Doni** — 'Tel' Krishna ki NAHI, Mahanadi ki tributary hai. [Q10]

⚠ EXAM TRAP — Tel — Mahanadi ki tributary hai, Krishna ki NAHI

- Hagari river (aka **Vedavathi**) Western Ghats se nikalti hai, Karnataka-Andhra Pradesh se hoke **Tungabhadra mein milti hai** — Veda aur Avathi rivers Sahyadri se nikal ke Pura mein milke Vedavathi banti hain. [Q11]
- South Indian tributary match: **Luni — Rajasthan, Indravati — Odisha/Maharashtra/Telangana/Chhattisgarh, Bhima — Maharashtra/Karnataka/Telangana, Ghatprabha — sirf Maharashtra/Karnataka.** [Q52]
- Source-region match: **Brahmagiri Hills — Cauvery, Verinag Spring — Jhelum, Mahabaleshwar — Krishna, Chotanagpur Plateau — Subarnarekha.** [Q58]
- Disputed tributary set: **Wardha — Pen Ganga, Mahanadi — Seonath, Damodar — Barakar, Cauvery — Bhavani** (Pen Ganga technically Godavari ki indirect/sub-tributary hai via Pranahita). [Q60]

19. Superimposed Rivers (Chambal, Son)

- Superimposed river/stream **lithosphere ke slopes follow NAHI karti** — underlying rocks change hone ke bawajood apna course-pattern retain karti hai. **Chambal aur Son** India mein iske best examples hain. [Q53]

20. West-Flowing Rivers — Mahi, Purna & Others

- Mahi river **Madhya Pradesh mein nikalti hai**, Rajasthan (Banswara) se hoke Gujarat mein **Gulf of Khambhat** mein girti hai. [Q55]
- Kishan Ganga **Jhelum river** ki main tributary hai — Kishanganga Project aur Tulbul Project dono isi river par hain. [Q56]

21. Mumbai's Mithi River

- Mithi river **Vihar Lake (Mumbai)** se nikalti hai — 2km baad **Powai Lake** ka paani bhi isme milta hai, ~18km behke **Mahim Bay ke paas Arabian Sea** mein girti hai. [Q57]

22. River Source-Region Match Sets

- Gandikota Canyon (India ka 'Grand Canyon', YSR/Kadapa district, Andhra Pradesh) **Pennar River** dwara banaya gaya hai. [Q61]

23. Fault Valley Drainage — Damodar

- River origin-place match: **Yamuna — Yamunotri, Krishna — Mahabaleshwar, Godavari — Nasik (Trimbakeshwar), Mahanadi — Sihawa.** [Q63]

24. Gandikota Canyon — Pennar River

- Statement-verification set: **Jhelum River, Wular Lake se hokar guzarti hai (SAHI — Wular ka main source Jhelum hai) — Krishna River seedhe Kolleru Lake ko feed NAHI karti (Budameru-Tammileru dwara indirectly), aur Kanwar Lake, Gandak ke meandering se NAHI (Burhi Gandak ke cutoff meander se) bani hai** — sirf pehla statement sahi hai. [Q64]

25. River Origin-Place Match Sets

- Note: Is chapter mein ek off-topic question (European capital cities — Riga, Rotterdam, Zagreb, Zurich) bhi tha, jo rivers se related nahi tha — isliye is mindmap mein exclude kiya gaya. [Q24]

26. Lakes Fed by Rivers — True/False Statements

- Khari river (Rajasthan) do alag rivers ka naam hai — **ek Gujarat mein Arabian Sea drainage ka hissa hai (Western Banas ki tributary), dusri Ajmer/Pushkar se nikalne wali Bay of Bengal drainage ka hissa hai (Banas → Chambal → Yamuna → Ganga)** — dono answers technically sahi hain, isliye disputed question hai. [Q34]
