

□ BLACK SOIL — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

📖 Topics in this chapter:

1. Regur/Black Soil — Basaltic Lava Origin
2. Names & Spread (Regur, Chernozem, Lava Soil)
3. Self-Ploughing — Water Retention Characteristic
4. Nutrient Composition — Rich vs Deficient
5. Best Suited for Cotton Cultivation
6. Karewas — Kashmir's Saffron Soil
7. Malwa Plateau & Lava Soil
8. Jharkhand's Black Soil — Rajmahal Region
9. Black Soil NOT Found in Himalayan Region

1. Regur/Black Soil — Basaltic Lava Origin

- Regur/Black soil **basaltic lava ke weathering** se bani hai — **Deccan Trap region (NW Deccan plateau)** ki typical soil hai, fissure volcanic rock se bani (granite/schist/shale-limestone se NAHI). [Q1, Q2]

2. Names & Spread (Regur, Chernozem, Lava Soil)

- Black soil ko **Regur** (Telugu word 'Reguda' se), **Black Cotton Soil**, **Tropical Chernozem** bhi kaha jaata hai — **Maharashtra, MP, Karnataka, Andhra Pradesh, Gujarat, Telangana** mein milti hai, total ~5.46 lakh sq km. **Maharashtra mein sabse zyada failii hai.** [Q3, Q4]

3. Self-Ploughing — Water Retention Characteristic

- Black soil ('self-ploughed soil' bhi kehlati hai) **high water retention capacity** rakhti hai — gili hone par phoolti/sticky hoti hai, sookhne par sukadti hai aur **wide cracks banati hai (self-ploughing)** — isliye **kam irrigation ki zaroorat hoti hai.** [Q5, Q11, Q15]

4. Nutrient Composition — Rich vs Deficient

- Black soil **Alumina, Iron, Lime, Magnesium carbonates, Potash** se rich hai — lekin **Phosphorus, Nitrogen aur Humus (organic matter)** ki kami hoti hai (isliye 'humus se rich' wala Assertion-Reason statement galat hota hai). [Q6, Q9, Q10]

⚠ **EXAM TRAP — Black soil rich hai minerals mein — humus/nitrogen/phosphorus mein NAHI (common Assertion-Reason trap)**

5. Best Suited for Cotton Cultivation

- Black soil **cotton cultivation ke liye sabse best** hai — Regur, Alluvial, Laterite, Red soil mein se. [Q7, Q12]

6. Karewas — Kashmir's Saffron Soil

- Karewas (glacial clay + moraine deposits) **Kashmir Himalaya** mein hain — **Saffron (Zafran) cultivation** ke liye famous. [Q8]

7. Malwa Plateau & Lava Soil

- Western India ki black soil ko '**Lava soil**' bhi kaha jaata hai (lava se bani hai) — **Malwa Plateau ki predominant soil black/lava soil hai.** [Q13, Q14]

8. Jharkhand's Black Soil — Rajmahal Region

- Jharkhand mein black soil **Rajmahal hill region** mein paayi jaati hai — Damodar valley, Subarnarekha valley, Palamu mein NAHI (NIDM report ke mutabik). [Q16]

9. Black Soil NOT Found in Himalayan Region

- Black soil (Regur) ke sahi facts: **locally 'Regur' kehlati hai, Krabs ke mutabik mature soil hai, highly moisture-retentive hai** — '**Himalayan region mein paayi jaati hai**' **GALAT hai** (Maharashtra, Gujarat, Karnataka, MP mein hai, Himalaya mein NAHI). [Q17]
