Chapter 01_ix_The_Saturn

Topic Index

1. Saturn — Orbit aur Rings
2. Saturn — Temperature aur Missions
3. Saturn — Moons

Saturn — Orbit aur Rings

- Saturn Sun ki 1 revolution ~**29.5 years** mein complete karta hai. *[Q1]*
- **Saturn** apne distinctive ring-system ke liye famous hai — 7 major rings identified; A, B, D, E rings Earth se dikhte hain; Saturn Earth se dekhne pe **yellow** dikhta hai. *[Q2]*
- Saturn ke alawa Jupiter, Uranus, Neptune ke bhi rings hain. *[Q2]*

Saturn — Temperature aur Missions

- **Cassini** spacecraft 7 saal ki journey ke baad June 2004 mein Saturn ki orbit mein enter hua (launched 15 Oct 1997). *[Q3]*
- Saturn **Neptune se warmer** hai (kyunki Saturn Sun ke zyada close hai order: Mercury→Venus→Earth→Mars→Jupiter→Saturn→Uranus→Neptune). *[Q4]*

Saturn — Moons

- **Titan** Saturn ka largest moon hai (diameter ~5,150 km); doosra largest **Rhea** hai (~1,528 km). Other moons: Atlas, Epimetheus, Tethys, Iapetus, Dione, Phoebe, Helene, Enceladus. *[Q5]*
