Chapter 01_viii_The_Jupiter

Topic Index

1. Jupiter — Discovery aur Size
2. Jupiter — Orbit aur Rings
3. Jupiter — Moons Count

Jupiter — Discovery aur Size

- Jupiter ke 4 largest moons — Io, Europa, Callisto, Ganymede — '**Galilean Moons**' kehlate hain (Galileo Galilei ne 1610 mein discover kiye). [Q1]
- **Jupiter** Solar System ka **largest AND heaviest** planet hai (diameter ~142,984 km, density ~1,326 kg/m³); apne axis pe sabse fast rotate karta hai. [Q2, Q3]

Jupiter — Orbit aur Rings

- Given options mein Jupiter Sun ki 1 revolution mein sabse zyada time (~11.86 years) leta hai (Earth 365 din, Mars 687 din, Venus 224.7 din). [Q4]
- Jupiter ke rings **fine dust particles** se bane hain (1979 mein Voyager 1 ne discover kiya); Saturn ke rings se thin aur faint hain. [Q5]

Jupiter — Moons Count

- 2009 exam context mein Jupiter ke sabse zyada known moons the (option A correct tha us waqt). [Q6]

EXAM TRAP

- NOTE: 2009 ke baad Saturn ne moon-count mein Jupiter ko overtake kar liya hai (2025 tak Saturn 274+, Jupiter 95+) — lekin exam-year context mein **Jupiter** hi correct answer maana jaata hai. [Q6]
