

The Asteroids — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

Chapter 01_xii_The_Asteroids

Topic Index

1. Asteroids — Location aur Size
2. Asteroids vs Comets — Difference

Asteroids — Location aur Size

- **Asteroids** = small rock-pieces jo **Mars aur Jupiter** ki orbits ke beech Sun ki parikrama karte hain. [Q1, Q2, Q3]
- Kuch asteroids ka diameter ~**1000 km** tak ho sakta hai. [Q1, Q2]

EXAM TRAP

- Asteroid belt **Mars-Jupiter** ke beech hai, Jupiter-Saturn ke beech NAHI — common location confusion. [Q3]

Asteroids vs Comets — Difference

- Asteroids **rocky/metallic** hote hain (Mars-Jupiter ke beech), Comets **ice+dust+rock** se bane hote hain (Kuiper Belt/Oort Cloud mein door bante hain). [Q4]
- Comets Sun ke close aane par **glowing tail** develop karte hain, Asteroids mein tail nahi hota. [Q4]

EXAM TRAP

- Statement 'comets Venus-Mercury ke beech pate jaate hain' **GALAT** hai — Comets Kuiper Belt/Oort Cloud mein (bahut door) bante hain, Venus-Mercury ke beech nahi. [Q4]
