

The Tropic of Cancer — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

Chapter 02_iv_The_Tropic_of_Cancer

Topic Index

1. Tropic of Cancer — Sun Altitude Calculation
2. Tropic of Cancer — Countries

Tropic of Cancer — Sun Altitude Calculation

- Winter Solstice (~22 Dec) pe, jab Sun Capricorn pe 90° (vertically) chamakta hai, tab Tropic of Cancer pe Sun altitude = $90^\circ - 47^\circ = 43^\circ$ (47° = Cancer aur Capricorn ke beech ka latitudinal difference: $23^\circ 30' + 23^\circ 30'$). [Q1]

Tropic of Cancer — Countries

- Tropic of Cancer in countries se guzarti hai: Mexico, Bahamas, Mauritania, Mali, Algeria, Niger, China, Taiwan, Western Sahara, Saudi Arabia, UAE, Oman, **India**, Bangladesh, Myanmar, Libya, Egypt. [Q2]
- **Iran** se Tropic of Cancer NAHI guzarti (yeh common confusion hai kyunki Iran Middle East mein hai aur nearby countries se guzarti hai). [Q2]

EXAM TRAP

- Middle East ke bahut se countries (Saudi Arabia, UAE, Oman) se Cancer guzarti hai lekin **Iran** se NAHI — is exception ko yaad rakho. [Q2]
