

The World Mountain — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

Chapter 07_The_World_Mountain

Topic Index

1. Asia Mountains — West to East Order
2. Named Mountain Ranges — Country/Location
3. Young vs Old Fold Mountains
4. Andes — World ki Sabse Lambi Range
5. South America — Precambrian Highlands
6. New Zealand — Southern Alps
7. Alps — Europe
8. Mountain-Continent Matching
9. White Mountains, Black Mountains
10. India-Myanmar Border Mountains
11. Black Forest — Germany, Rhine River
12. Young vs Old Mountains — Odd One Out
13. Africa Mountains
14. Country-Mountain Matching (Multiple Sets)
15. Switzerland/Italy Mountains
16. Spain-France Border — Pyrenees
17. Golan Heights
18. Constructive Landform Recap
19. Asia Minor — Taurus Mountains
20. Epeirogenic Forces

Asia Mountains — West to East Order

- West-to-East order: **Pontic** → **Zagros** → **Hindu Kush** → **Karakoram** — Pontic (Turkey, Black Sea south), Zagros (Iran), phir Pamir Knot se Hindu Kush west aur Karakoram east ki taraf extend hoti hai. [Q1]

Named Mountain Ranges — Country/Location

- **Darling Range** = Australia ke **South-Western coast** pe hai (Western Australia). [Q2]
- **British Columbia** ko 'Sea of Mountains' kehte hain (Molyneux St. John, 1876, Lord Dufferin's tour ke account mein). [Q3]

Young vs Old Fold Mountains

- World ke highest peaks (Everest included) mainly **Young Folded Mountains** mein hain (jaise Himalaya). [Q4]
- Young fold mountains: Rockies, Himalaya, Alps — **Sierra Nevada block mountain** hai, young fold nahi. [Q7]

Andes — World ki Sabse Lambi Range

- **Andes** = world ki longest continental mountain range (~7,000-8,900 km), South America ke western coast ke saath — Rockies ~4,800km, Himalaya ~2,500km, Alps ~1,200km se lambi. [Q5,Q10,Q11,Q13]
- Andes South America continent mein hai. [Q8,Q9]
- Given 6 countries mein Andes 4 se guzarti hai: Bolivia, Colombia, Ecuador, Venezuela (Brazil aur Paraguay se NAHI — poori list: Venezuela, Colombia, Ecuador, Peru, Bolivia, Chile, Argentina). [Q12]
- Length descending order: **Andes > Rocky > Great Dividing Range > Himalaya**. [Q15]

South America — Precambrian Highlands

- **Pacaraima Mountains** (Guiana Highlands ka part) mainly **ancient Precambrian rocks** (Guiana Shield, ~1.8 billion+ years old) se bane hain — Andes iske comparison mein bahut younger hai. [Q6]

New Zealand — Southern Alps

- **Southern Alps** = **New Zealand** (South Island, western side) mein hai — highest peak Aoraki/Mount Cook (~3,724m). [Q14]

Alps — Europe

- **Alps** = Europe ki mountain range, France/Austria/Germany/Switzerland tak extend hoti hai — **England ka part NAHI** hai (Mont Blanc iski highest peaks mein se ek hai). [Q16],[Q17]

Mountain-Continent Matching

- Matching: Andes-South America, Altai-Asia, Alps-Europe, Appalachian-North America. [Q18]

White Mountains, Black Mountains

- **White Mountains** = USA (New Hampshire, Maine states). [Q19]
- **Black Mountains** = USA (North Carolina) mein hain, Appalachian mountain system ka part. [Q25]

India-Myanmar Border Mountains

- India-Myanmar boundary determine karne wale ranges: option 'Khasi, Patkoi, Arakan Yoma' galat hai (Khasi Hills Meghalaya mein hain, border define nahi karte) — exam-accepted answer '**None of the above**' hai. [Q20]
- **Arakan Yoma** = Myanmar mein hai, Himalaya ka southward extension maana jaata hai. [Q21]

EXAM TRAP

- Khasi Hills **Meghalaya (India)** mein hain, ye India-Myanmar border define nahi karte — is combination ko wrongly correct mat maano. [Q20]

Black Forest — Germany, Rhine River

- **Black Forest** = **Germany** mein hai (block-mountain region), highest peak Feldberg (~1,493m). [Q22,Q23]
- Rhine River ke saath located mountain: **Black Forest** (Rhine ke East mein) — Vosges Mountains (France) Rhine ke West mein hain, Rhine Rift Valley ke across. [Q24]

Young vs Old Mountains — Odd One Out

- Alps, Andes, Himalayas — young/Alpine-Tertiary phase; **Appalachian** different hai (old fold mountain). [Q26]
- Tertiary orogeny ka result NAHI: **Appalachians** (old fold mountain) — Kunlun, Alps, Andes Tertiary orogeny ke results hain. [Q27]
- Old folded mountains: Ural, Aravalli, Appalachian — **Andes young fold mountain hai** (old nahi). [Q28]
- Given match-table mein sirf **2 rows correct** hain: North America-Appalachians (Fold✓) aur South America-Andes (Fold✓) sahi hain; Central Asia-Vosges aur Europe-Alps wale rows galat hain. [Q29]
- Pennines (Europe), Appalachians (America), Aravallis (India) — teeno **Old Mountains** ke examples hain. [Q30]

Africa Mountains

- **Drakensberg** = South Africa (+ Lesotho) mein hai — highest peak Thabana Ntlenyana (~3,482m, Lesotho mein). [Q31]
- **Atlas Mountains** = Africa continent mein hain (Morocco, Algeria, Tunisia, ~2,400km) — Mediterranean climate ko Sahara se separate karte hain. [Q32,Q33]

Country-Mountain Matching (Multiple Sets)

- Allegheny-USA, Cantabrian-Spain, Elburz-Iran, Mackenzie-Canada. [Q34]
- Kosciuszko-Australia, Mount McKinley-North America, Elbrus-Europe, Kilimanjaro-Africa. (Mount McKinley/Denali naam 2015-2025 Denali tha, 2025 mein wapas McKinley kar diya gaya). [Q35]
- Elbrus **Europe** ka highest mountain hai, Asia ka NAHI — yeh common wrong pairing hai. [Q36]
- Kilimanjaro-Tanzania, Toubkal-Morocco, Stanley-Uganda, Hoggar-Algeria. [Q37]
- Type matching: Alps-Folded, Vosges-Block, Vindhya-Residual, Fujiyama-Volcanic. [Q38]
- Elbrus-Russia, Kilimanjaro-Tanzania, Mt.Cook-New Zealand, Mount McKinley-USA. [Q47]
- Atlas-Morocco, Kilimanjaro-Tanzania, Chimborazo-Ecuador, Pyrenees-France/Spain. [Q48]

EXAM TRAP

- Elbrus Europe ka highest peak hai — Asia se match karna common exam trap hai. [Q36]

Switzerland/Italy Mountains

- **Mount Titlis** = Switzerland mein hai. [Q39]
- **Apennine Mountains** = Italy mein hain (~1,350km), highest peak Corno Grande — Pyrenees (France-Spain), Dinaric Alps (Balkans), Jura (France/Switzerland) se compare karo. [Q40]

Spain-France Border — Pyrenees

- **Pyrenees** = **Spain aur France** ke beech natural boundary banate hain (Bay of Biscay se Mediterranean Sea tak). *[Q41, Q43, Q44]*
- Matching: Spain-France–Pyrenees, Switzerland–Alps, Bulgaria–Balkan, Italy–Apennine. *[Q42]*

Golan Heights

- **Golan Heights** = **Middle East** (South-Western Syria) mein hai — 1967 war mein Israel ne Syria se occupy kiya tha. *[Q45]*

Constructive Landform Recap

- **Volcanic Cone** = constructive/basic landform hai (lava/ash accumulation se) — Residual mountain, Monadnock, Erosional waterfall erosion se associated hain. *[Q46]*

Asia Minor — Taurus Mountains

- **Taurus Mountains** = Asia Minor (modern Turkey) ke Mediterranean coast ke saath hain — Anatolian Plateau ki southern boundary banate hain. *[Q49]*

Epeirogenic Forces

- **Epeirogenic forces** = **Vertical earth movements** ka result hain (broad crustal uplift/subsidence over large areas) — horizontal movements NAHI. *[Q50]*
