

The Arid Regions Deserts — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

Chapter 10_The_Arid_Regions_Deserts

Topic Index

1. Hot Deserts — Location Theory
2. Deserts — Solar Energy Potential
3. Desert ki Definition
4. Australia — Interior Desert
5. Desertification
6. World ka Largest Hot Desert
7. Most Populated Desert
8. Named Deserts — Location Matching
9. Deserts by Size — Ranking
10. Atacama Desert
11. Temperate Deserts
12. Tropical Deserts aur Monsoon Winds
13. Kalahari Desert
14. African-Eurasian Desert Belt — Formation Cause
15. Desert Animals — Terminology

Hot Deserts — Location Theory

- World ke zyadatar hot deserts **15°-30° latitude** ke beech, continents ke **western margins** pe hain — Trade winds westward jaate hue apni moisture kho dete hain (dono statements TRUE, R sahi explanation hai A ka). [Q1]
- Desert-formation probability sabse zyada **~23° latitude** ke around hoti hai (subtropical high-pressure, dry descending air). [Q4]

Deserts — Solar Energy Potential

- Deserts perennial solar-energy source ho sakte hain — ~6 hours mein deserts ko itni solar energy milti hai jitni poori humanity 1 saal mein consume karti hai (Gerhard Knies ka argument) — dono TRUE, R explains A. [Q2]

Desert ki Definition

- Desert = wo region jaha **annual rainfall <25 cm** hoti hai. [Q3]

Australia — Interior Desert

- Assertion: Australia ka interior part desert/semi-desert hai — **TRUE** (~70% Australia arid/semi-arid); Reason: Northern Australia temperate zone mein hai — **FALSE** (Northern Australia actually tropical zone mein hai, temperate south mein hota hai). [Q5]

Desertification

- Given options mein desertification ki problem sabse KAM: **Europe** — UNCCD ke according desertification arid/semi-arid/dry-sub-humid areas mein land degradation hai. [Q6]

World ka Largest Hot Desert

- Sahara** (North Africa) = world ka largest HOT desert; **Antarctica** = largest desert overall (polar deserts including). [Q7, Q8]

Most Populated Desert

- Thar Desert** = world ka most densely populated desert (~83 persons/sq km). [Q9]

Named Deserts — Location Matching

- Takla Makan Desert** = China (Xinjiang, south-western part). [Q10]
- Correct pairs: Sonoran-USA, Taklamakan-China, Karakum-Turkmenistan — **Gibson Desert Brazil mein NAHI** (Western Australia mein hai). [Q11]
- Karakum Desert** = Turkmenistan mein hai (Kazakhstan Kyzylkum/Betpak-Dala se associated hai, Karakum se nahi). [Q12]
- Dasht-e-Lut** = Iran (Kerman, Sistan-Baluchestan provinces) — 2005 mein NASA ne yahan ~70.7°C surface temp record kiya. [Q13]
- Gobi Desert** = Mongolia (mainly southern) AND China (northern) — Russia/Kazakhstan tak nahi phailta. [Q14, Q15]
- Thar Desert** (Great Indian Desert) = South Asia ka largest desert (NW India → SE Pakistan). [Q17]
- Great Victoria Desert** = Australia (Western + South Australia) — Australia ka largest desert (~348,750 sq km). [Q27]
- Matching: Gobi-Asia, Patagonia-South America, Victoria-Australia, Kalahari-Southern Africa. [Q28]

EXAM TRAP

- 'Gibson Desert – Brazil' pairing **GALAT** hai — Gibson Desert Western Australia mein hai. [Q11]

Deserts by Size — Ranking

- Size increasing order: **Great Sandy** (~285K sq km) < **Gobi** (~1.3M) < **Arabian** (~2.3M) < **Sahara** (~8.6M sq km). [Q16]

Atacama Desert

- Atacama** = South America mein hai (mainly **Northern Chile aur Southern Peru**, NOT Southern Chile — yeh common trap hai); world ka driest non-polar desert hai; sodium nitrate/copper rich hai. [Q18, Q19, Q20]

- Atacama ki extreme aridity: subtropical high-pressure + cold Humboldt Current + Andes rain-shadow effect — teeno factors combine hote hain. [Q20]

⚠ EXAM TRAP

- Atacama **Northern Chile** mein hai, Southern Chile mein NAHI — yeh common wrong statement hai. [Q18]

Temperate Deserts

- Temperate deserts mid-latitudes ($\sim 30^\circ$ - 60°) mein hote hain — examples: Gobi, Ladakh, **Patagonia**. [Q21]

Tropical Deserts aur Monsoon Winds

- Tropical deserts trade-wind belts (continents ke western ends) mein pate jaate hain — Statement 1 **TRUE**; India ka Eastern Himalayan region **South-West monsoon** (Bay of Bengal) se zyada rain paata hai, North-East winds se NAHI — Statement 2 **FALSE**. [Q22]

Kalahari Desert

- **Kalahari** ($\sim 930,000$ sq km) mainly **Botswana** mein hai, kuch part **Namibia** mein bhi — South Africa/Zaire/Zambia mein nahi (given list mein). [Q23]
- Kalahari **Southern Hemisphere** mein hai; naam 'Kalahari' Tswana word se aaya hai (meaning: 'great thirst'/'waterless place'). [Q24]

African-Eurasian Desert Belt — Formation Cause

- African-Eurasian desert belt formation: **Subtropical high-pressure cells** (Statement 1) main reason hai — descending dry air; **Warm ocean currents** necessary condition NAHI hain (Statement 2 FALSE — Gobi cold desert warm current ke bina bhi bana hai). [Q25]

Desert Animals — Terminology

- Desert mein rehne wale jeev **Xerocoles** kehlate hain (Fossorial=digging/underground, Arboreal=trees, Terrestrial=land — general terms hain, desert-specific nahi). [Q26]
