Chapter 28_Landforms_by_River

Topic Index

1. Delta Formation — Favourable/Unfavourable Conditions
2. World ka Largest Delta
3. Delta Types — Bird's Foot
4. Grand Canyon
5. Chisapani Gorge — Nepal
6. Landform-Agent Matching
7. Nobi aur Kanto Plains — Japan

Delta Formation — Favourable/Unfavourable Conditions

- Delta formation ke liye favourable: bada sediment load, low river velocity + gentle gradient, shallow sea/broad continental shelf — **Deep sea unfavourable** hai (sediment deeper water mein disperse ho jaata hai, stable delta banana mushkil). [Q1]

World ka Largest Delta

- **Ganga Delta (Ganga-Brahmaputra-Meghna/Sundarban Delta)** = world ka largest delta (~1,05,641 sq km) — Bangladesh + West Bengal (India) mein hai, **arcuate (arc-shaped)** delta hai. [Q2]

Delta Types — Bird's Foot

- **Mississippi River** Gulf of Mexico mein '**Bird's Foot**' type delta banati hai — Nile River iske contrast mein **arcuate delta** banati hai. [Q3]

Grand Canyon

- **Grand Canyon** = **Gorge** hai (Colorado River se Arizona, USA mein carved) — length ~446-447km, average width ~6.4-29km, depth 1.8km+. [Q4]

Chisapani Gorge — Nepal

- **Chisapani Gorge** = **Nepal** mein hai — **Karnali River** se cut hui hai (Himalayan region se plains ki taraf nikalte waqt) — Karnali Nepal ki longest river-system hai. [Q5]

Landform-Agent Matching

- Correct: Canyon-River (erosion), Zeugen-Wind (arid regions erosion), Moraine-Glacier (deposition) — **Inselberg-Glacier GALAT** hai (Inselberg isolated residual hill hai, arid/semi-arid long-term denudation se banta hai, glacial landform NAHI hai). [Q6]

EXAM TRAP

- Inselberg glacial landform NAHI hai — arid/semi-arid regions ka denudation feature hai. [Q6]

Nobi aur Kanto Plains — Japan

- **Nobi Plain** (central Japan, ~1,800 sq km) aur **Kanto Plain** (Japan ka sabse extensive lowland, ~17,000 sq km, Tokyo yahin hai, central Honshu, Pacific-facing) dono **Japan** mein hain. [Q7]
