Chapter 34 _The_Coral_Reefs

Topic Index

1. Coral Reefs — General Location
2. Great Barrier Reef — Location aur Facts
3. Coral Reefs — Global Statistics
4. Addu Atoll — Maldives
5. Atoll — Shape

Coral Reefs — General Location

- Coral reefs mainly **Tropic of Cancer** aur **Tropic of Capricorn** ke beech **coastal areas** mein milte hain — generally 30°N-30°S tak extend hote hain. Oceans ka sirf ~0.08-0.16% area cover karte hain lekin ~25% marine species yahin milti hain. [Q1]

Great Barrier Reef — Location aur Facts

- **Great Barrier Reef** = **Australia** ke near (Pacific Ocean, Queensland coast, NE Australia) hai — world ki largest coral reef, ~2,300km lambi (10°S-24°S ke beech mainly) — 450+ hard coral species, 1,625+ fish species, 3,000+ mollusc species. [Q2, Q3, Q4, Q5, Q6]

EXAM TRAP

- Great Barrier Reef ki length ~2,300km hai, 2,500km se zyada NAHI — exact figure yaad rakho. [Q3]

Coral Reefs — Global Statistics

- Coral reefs mainly **tropical waters** mein hain (Statement 1 TRUE); world ki **1/3 se zyada reefs Australia, Indonesia, Philippines** mein hain (~19% Australia, ~17% Indonesia — Statement 2 TRUE); coral reefs mein **tropical rainforests se ~4x zyada animal phyla** hote hain (32/33 phyla, 25,000+ species — Statement 3 TRUE) — teeno statements sahi hain. [Q7]

Addu Atoll — Maldives

- **Addu Atoll** = **Indian Ocean** mein hai — Maldives ka southernmost atoll. [Q8]

Atoll — Shape

- Atoll ki shape **horse-shoe/ring-shaped** hoti hai — lagoon ke around coral reef, diameter kai kilometres tak ho sakta hai, tropical/subtropical oceans mein milta hai. [Q9]
