

A Agriculture and Livestock — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

Chapter 48_A_Agriculture_and_Livestock

Topic Index

1. Wheat aur Rice — Leading Producer China
2. Rice — India ka World Rank aur Cultivation Area
3. Wheat — Production Order aur Largest Producer
4. Rice Productivity — China Highest (Yield/Hectare)
5. Hybrid Rice — China mein Sabse Popular
6. Rice Gene Bank — Philippines
7. Rice Export Earnings — 2/3rd Premise Disputed
8. Sugarcane — Brazil #1, India #2
9. Sugar Beets — France, Russia (2010 Data)
10. Cotton — Cotton-Seed Producer aur Yield Records
11. Castor-Oilseeds — India ka Dominance
12. Bananas — India Largest Producer
13. Coconut — Indonesia Largest Producer
14. Philippines — Coconut+Sugarcane Development Credit
15. India — Fruit Production Rank (2nd)
16. Tobacco, Jowar, Soyabean, Silk — Largest Producers
17. Mauritius — Highest % Sugar Export
18. Natural Rubber — Thailand Largest Producer
19. Natural Rubber — Thailand+Indonesia Major Producers
20. Sri Lanka — Coffee Cultivation Abandoned (Leaf Rust)
21. Coffee — Top Producers (Brazil #1, Vietnam #2)
22. Robusta Coffee — Africa Origin
23. Tea — Export Rankings (Quantity vs Value)
24. Crop — Production Zone Matching (Multi-set)
25. Cocoa/Coffee/Tea/Sugarcane — Country Matching
26. USA — Hawaii mein Coffee
27. Apple — Non-Tropical Fruit
28. Commercial Horticulture — Small Holdings, Zyada Labour
29. Crop-Country Matching (Rubber/Coffee/Olive/Sugarcane)
30. Leading Producer-Commodity Matching
31. Plantation Agriculture — Characteristics
32. Alley Cropping — Trees ke Beech Crops
33. Monoculture — Commercial Grain Farming
34. Shifting Cultivation — Fazenda Exception
35. Taungya, Ladang — Shifting Cultivation Systems
36. Nitrogen Deficiency — Plant Symptoms
37. Biofertilizers — Nostoc (Blue-Green Algae)
38. Alfalfa — Ancient Herb (Asia Native)
39. Africa mein Tea Plantations — Exist Karti Hain

40. Podzol Soil — Taiga Region
41. Mocha Coffee — Yemen
42. Tea main Compounds — Morphine NAHI
43. Green Box — International Agriculture Agreement
44. Plantation Crops — Country Correct Statements
45. Heroin — Opium Resin se
46. Golden Crescent — Afghanistan+Iran+Pakistan
47. Maize — Middle Africa ka Staple Food
48. Sacramento-San Joaquin Valley — California
49. Commercial Viticulture — Mediterranean Europe
50. High-Yielding Variety Seeds — Mexico (Norman Borlaug)
51. Catechu — Khair Tree Wood
52. Peanuts/Groundnut — Main Crop aur Native Place
53. Shahtoosh — Tibetan Antelope (Chiru) Wool
54. Apiculture, Viticulture, Olericulture — Terminology
55. Silk Production — China #1, India #2
56. Australia — Cattle Rearing Mainly Meat ke liye
57. China — Largest Livestock Population
58. Mad Cow Disease — Beef Image Destroyed
59. Milk — India World ka Leading Producer
60. Milk Production per Cow — Denmark Highest (Given Options)
61. Corn — China 2nd Rank
62. 'Sugar Bowl of World' — Cuba
63. Fazenda — Brazil ki Coffee Plantations
64. Country — Principal Primary Export Matching
65. Rice — India Largest Exporter
66. Saffron — Iran Largest Producer
67. Economic Activity — Country Matching
68. Cocoa — Top Producers (Cote d'Ivoire, Ghana)
69. India vs China — Arable Area Comparison
70. India — Cropland Area Highest (vs USA/China/Japan)
71. 'Cereal Yield' — Production per Unit Area
72. Crop Rotation — Soil Nutrient Replenishment
73. Mediterranean Agriculture — Region Coverage

Wheat aur Rice — Leading Producer China

- Exam-period data ke according **China** wheat aur rice dono ka leading producer tha (rankings time ke saath change ho sakti hain). [Q1]

Rice — India ka World Rank aur Cultivation Area

- FAO 2024 ke according **India** world ka **largest rice producer** hai. [Q2]
- Rice cultivation area (FAO 2024, hectares): **India-50,511,930 (highest)**, China-29,256,900, Philippines-4,645,921, Japan-1,458,000. [Q3]

Wheat — Production Order aur Largest Producer

- Wheat production descending order: **China > India > Russia > USA**. [Q4]
- FAO 2024 ke according world ka largest wheat producer **China** hai. [Q5]

Rice Productivity — China Highest (Yield/Hectare)

- Rice productivity (production per unit harvested area) mein **China** Japan se thoda upar aur India se kaafi upar hai (Germany major rice-producer NAHI hai). [Q6]

Hybrid Rice — China mein Sabse Popular

- Hybrid rice cultivation **China** mein sabse popular hai — half se zyada rice-growing land pe hybrid rice cultivate hoti hai. [Q7]

Rice Gene Bank — Philippines

- World ka 'Rice Gene Bank' **International Rice Research Institute, Los Banos (Philippines)** mein hai. [Q8]

Rice Export Earnings — 2/3rd Premise Disputed

- FAO data ke according, diye gaye 4 countries mein se koi bhi apni export earnings ka ~2/3 rice trade se NAHI kamata — **Thailand highest (~14%)**, Myanmar ~12%, Japan <1%, Indonesia negligible — isliye is premise se match karne wala koi option NAHI hai, question disputed (*) hai. [Q9]

Sugarcane — Brazil #1, India #2

- FAO 2024 (million tonnes): **Brazil 759.66 (largest)**, India 453.16, China 102.09, Pakistan 84.24. [Q10]
- Sugarcane ka world mein 2nd largest producer **India** hai (Brazil ke baad). [Q11]

Sugar Beets — France, Russia (2010 Data)

- 2010 exam-data ke according **France aur Russia** world ke 2 leading sugar beet producers the. [Q12]
- Sirf sugar-beets se sugar produce karne wala desh **Ukraine** hai (almost 100% sugar-beet based). [Q13]

Cotton — Cotton-Seed Producer aur Yield Records

- Cotton-seed ka largest producer **China** hai. [Q14]
- 2014 reference year ke according, cotton ki highest per-hectare production wala desh (given options mein) **Australia** tha — baad ke FAO data mein rankings different hain (yield comparisons time-sensitive hote hain). [Q15]
- Older exam question mein cotton ki highest per-acre yield **China** mein accepted thi (FAO 2024 data bhi China ko seed-cotton productivity mein highest maanta hai given options mein). [Q16]

⚠️ EXAM TRAP

- Cotton yield comparisons **time-sensitive** hote hain — 2014 ka answer Australia tha, current data mein alag ho sakta hai. Exam question ka specific reference year dhyan se dekho. [Q15]

Castor-Oilseeds — India ka Dominance

- **India** castor seed+castor oil ka world ka dominant producer AUR leading exporter (oil+derivatives dono) hai. [Q17]

Bananas — India Largest Producer

- FAO 2024 (million tonnes): **India 37.61 (largest)**, China 11.76, Indonesia 9.26, Ecuador 7.56, Brazil 7.05. [Q18]

Coconut — Indonesia Largest Producer

- FAO 2024 (million tonnes, shell): **Indonesia 17.97 (largest)**, India 14.71, Philippines 14.50. [Q19]

Philippines — Coconut+Sugarcane Development Credit

- Philippines mein coconut+sugarcane agriculture develop karne ka credit **Spanish aur Americans** ko jaata hai. [Q20]

India — Fruit Production Rank (2nd)

- India world ka **2nd largest fruit producer** hai (China ke baad, Indian govt horticulture summaries ke according) — India banana+mango jaise individual fruits mein #1 hai, lekin total fruit production mein 2nd. [Q21]

Tobacco, Jowar, Soyabean, Silk — Largest Producers

- FAO 2024 (million tonnes, unmanufactured tobacco): **China 2.26 (largest)**, India 0.73, Brazil 0.64. [Q22]
- Given statements mein: China (Tobacco) aur USA (Jowar, source mein 'U.S.A.' likha hai, India NAHI) exam-accepted correct hain — Statement 1,2 correct maane gaye. [Q23]

Mauritius — Highest % Sugar Export

- Given options mein apni sugar production ka sabse zyada % export karne wala desh **Mauritius** hai — Mauritius ki economy mainly sugar exports+tourism pe depend karti hai. [Q24]

Natural Rubber — Thailand Largest Producer

- FAO 2024 (thousand tonnes): **Thailand 4,789.04 (largest)**, Indonesia 2,262.09, Cote d'Ivoire 1,686.59, Vietnam 1,327.47, China 877.60. [Q25]

Natural Rubber — Thailand+Indonesia Major Producers

- 2 major natural rubber producers: **Thailand aur Indonesia** (FAO 2024, Thailand #1, Indonesia doosre number pe). [Q26]
- World ka ~1/3rd natural rubber production **Thailand** se aata hai. [Q27]
- Exam-context ke according largest rubber cultivation **Indonesia** mein hoti hai. [Q28]

Sri Lanka — Coffee Cultivation Abandoned (Leaf Rust)

- Sri Lanka mein coffee cultivation 1860s se '**Leaf Rust**' (*Hemileia vastatrix*) epidemic ki wajah se abandon ho gayi (1869 se start) — yeh fungus coffee leaf rust disease cause karta hai, British colonies mein widespread thi. [Q29]

Coffee — Top Producers (Brazil #1, Vietnam #2)

- FAO 2024 leading coffee(green) producers: **Brazil, Vietnam** (top 2) — phir Colombia, Indonesia, Ethiopia, Uganda, India. [Q30]
- FAO 2023 (thousand tonnes): **Brazil 3,387.72 (highest)**, Vietnam 2,015.29, Colombia 839.85. [Q31]
- Total coffee production % mein top country **Brazil** hai (FAO 2024). [Q32]
- Coffee ka 2nd largest exporter (quantity se, Brazil ke baad) **Vietnam** hai (FAO 2024). [Q33]

Robusta Coffee — Africa Origin

- Robusta (*Coffea Canephora*) **Central+Western sub-Saharan Africa** (specifically Ethiopia+Uganda) se originate hui — India mein bhi cultivate hoti hai. [Q34]

Tea — Export Rankings (Quantity vs Value)

- Tea export maximum quantity mein **Kenya** (2024) largest exporter hai — China value ke basis pe leading exporter hai, Sri Lanka historically major exporter raha hai. [Q35]
- 2016 exam (2015 data pe based) ke according **China** value ke basis pe largest tea exporter tha — 2024 tak Kenya quantity mein largest ban gaya (rankings year+metric ke saath shift hoti hain). [Q36]
- 2016-17 mein value(\$) ke basis pe largest tea exporter **China** tha (2017 aur 2024 dono years mein) — India 2024 mein 4th rank pe hai. [Q37]

⚠ EXAM TRAP

- Tea export rankings **quantity vs value** metric ke hisaab se alag hote hain — Kenya quantity mein #1, China value mein #1. Exam question ka exact wording dhyan se dekho. [Q35, Q36]

Crop — Production Zone Matching (Multi-set)

- Coffee-Sao Paulo Plateau, Jute-Ganges delta, Rice-Yangtze plains, Wheat-Prairies plains. [Q38]

- Rice-Yangzi Jiang basin, Wheat-Huang He basin (winter wheat), Coffee-Sao Paulo, Tea-Kandy basin (Sri Lanka). [Q39]

Cocoa/Coffee/Tea/Sugarcane — Country Matching

- Cocoa-Ghana, Coffee-Ivory Coast, Tea-Kenya, Sugarcane-South Africa. [Q40]

USA — Hawaii mein Coffee

- USA ke states mein **Hawaii** coffee grow karta hai — famous 'Kona coffee' Hawaiian variety hai. [Q41]

Apple — Non-Tropical Fruit

- Given fruits mein **Apple non-tropical** hai — temperate+subtropical regions mein commercially cultivate hota hai (apple trees ko flower ke liye cold climatic conditions chahiye). [Q42]

Commercial Horticulture — Small Holdings, Zyada Labour

- Small-sized holdings pe large amount labour **Commercial Horticulture** system mein apply hota hai — fruits, spices, vegetables, shrubs, flowers, turf, tea, coffee, sugarcane, rubber isme cultivate hote hain, continuous supervision zaroori hoti hai. [Q43]

Crop-Country Matching (Rubber/Coffee/Olive/Sugarcane)

- Rubber-Malaysia, Coffee-Colombia, Olive-Italy, Sugarcane-Mauritius. [Q44]

Leading Producer-Commodity Matching

- China-Iron Ore, India-Milk, Saudi Arabia-Petroleum, Thailand-Natural Rubber. [Q45]

Plantation Agriculture — Characteristics

- Tropical plantation world ke oldest commercial agriculture systems mein se ek hai — **mostly lowlands mein located, sea coast ke along bunches mein found** hoti hai — usually >40 hectares (100 acres) ke large estates pe monoculture follow karti hai (Brazil coffee, tea jaise examples). [Q46]
- Plantation crops: **Coffee, Rubber, Coconut** (conventional classification mein) — Spices is category mein NAHI aate. [Q47]

Alley Cropping — Trees ke Beech Crops

- **Alley Cropping** = planted trees ki rows ke beech interspaces mein crops grow karne ka system hai (wide-spaced tree rows + companion crop alleyways mein) — Intercropping ek broader term hai jisme relay+mixed+alley cropping sab shamil hain. [Q48]

Monoculture — Commercial Grain Farming

- 'Monoculture' **Commercial Grain Farming** ki distinct characteristic hai. [Q49]

Shifting Cultivation — Fazenda Exception

- Jhooming, Chena, Milpa sab shifting cultivation ke types hain — **Fazenda shifting cultivation ka type NAHI** hai (Fazenda actually Brazil mein plantations se related hai). [Q50]

⚠ EXAM TRAP

- Fazenda **Brazil ki plantations** se related hai, shifting cultivation se NAHI — common confusion. [Q50]

Taungya, Ladang — Shifting Cultivation Systems

- 'Taungya' agriculture mainly **Myanmar** mein practice hoti hai — villagers/forest workers ko forest ki early stage mein agricultural crops cultivate karne ka right milta hai. [Q51]
- 'Ladang' = **Malaysia+Indonesia** mein shifting cultivation ke liye local naam. [Q52]
- Primitive subsistence agriculture: **Jhumming-SE Asia, Milpa-Mexico+Central America correct** hain — **Ladang actually Indonesia mein hai, Sri Lanka mein NAHI** (slash-and-burn farming, world ke many tribes mein prevalent, India included). [Q53]

⚠ EXAM TRAP

- Ladang **Indonesia/Malaysia** mein practice hoti hai, Sri Lanka mein NAHI. [Q53]

Nitrogen Deficiency — Plant Symptoms

- Nitrogen-deficient plants mein stunted growth + pale green/yellow leaves dikhte hain (A **TRUE**) — Nitrogen green leaf growth ke liye responsible hai (R **TRUE**, sahi explanation) — nitrogen cells/tissues formation ka major constituent hai, kami se chlorophyll content ghat jaata hai. [Q54]

Biofertilizers — Nostoc (Blue-Green Algae)

- Biofertilizers ke roop mein **Nostoc** (blue-green algae/cyanobacteria) use hota hai — Azotobacter, Rhizobium, Azospirillum bhi long time se biofertilizers hain — Nostoc/Anabaena/Tolypothrix/Aulosira atmospheric nitrogen fix karke paddy crops (upland+lowland) mein inoculation ke roop mein use hote hain. [Q55]
- Azolla-Anabaena Biofertilizer **Rice crop** production ke liye use hota hai. [Q56, Q57]
- Blue-Green Algae biofertilizer **Paddy crop** production induce karne ke liye use hoti hai. [Q58]

Alfalfa — Ancient Herb (Asia Native)

- **Alfalfa (Medicago sativa)** = Asia se native plant, mankind ke sabse purane known herbs mein se ek — naturally high in vitamins A,C,E,K + B-vitamins, biotin, calcium, folic acid, iron, magnesium, potassium. [Q59]

Africa mein Tea Plantations — Exist Karti Hain

- 'Africa mein koi tea plantations NAHI hain' — yeh statement **FALSE** hai (A galat) — Africa mein tea pehli baar Durban Botanical Garden mein 1850 mein produce hui thi, WWII tak ~800 hectares land tea cultivation mein thi, 20th century mein Kenya/Tanzania/Uganda major tea producers ban gaye. Tea plants ko fertile soil+high humus chahiye (R TRUE independently). [Q60]

EXAM TRAP

- Africa mein tea plantations **exist karti hain** (Kenya, Tanzania, Uganda major producers hain) — 'no tea plantations in Africa' statement galat hai. [Q60]

Podzol Soil — Taiga Region

- **Podzol** soil = ~60°N latitude ke near, Eurasia+North America ke coniferous forest (Taiga region) mein milti hai. [Q61]

Mocha Coffee — Yemen

- **Mocha coffee** = **Yemen** mein grow hoti hai — Mocha seaport (jahan se export hoti thi) se naam mila. [Q62]

Tea mein Compounds — Morphine NAHI

- Tea mein Theanine, caffeine, polyphenols, tannin, theobromine, theophylline milte hain — **Morphine NAHI milta** (Tea originally China mein medicinal drink ke roop mein use hoti thi). [Q63]

Green Box — International Agriculture Agreement

- Green Box mein economic assistance shamil hai: **Agricultural Research, Fertilizer, Irrigation, Plant Protection** (research programs, pest+disease control, training, inspection services etc.). [Q64]

Plantation Crops — Country Correct Statements

- Cocoa-Ghana, Coffee-Brazil, Tea-Sri Lanka, Rubber-Malaysia — sab famous plantation crop pairings hain (given options mein galat statement identify karna tha). [Q65]

Heroin — Opium Resin se

- **Heroin** opium resin se obtain hoti hai. [Q66]

Golden Crescent — Afghanistan+Iran+Pakistan

- Golden Crescent (Asia ka illicit opium production area, Central+South Asia) mein shamil: **Afghanistan, Iran, Pakistan** — **Iraq** **shamil NAHI** hai. [Q67]

⚠ **EXAM TRAP**

- Golden Crescent mein **Iraq** **shamil NAHI** hai — sirf Afghanistan, Iran, Pakistan. [Q67]

Maize — Middle Africa ka Staple Food

- Maize/corn **Middle Africa** ke logo ke liye important staple food hai (vitamins A,C,E + carbohydrates + minerals + protein + dietary fiber rich). [Q68]

Sacramento-San Joaquin Valley — California

- Sacramento-San Joaquin Valley (vitreous+citrus fruit production ke liye famous) **California** mein hai — California ke Central Valley ka part. [Q69]

Commercial Viticulture — Mediterranean Europe

- Commercial Viticulture **Mediterranean Europe** ke liye specific hai (A TRUE) — ~85% grapes wine-making mein jaate hain (R TRUE, sahi explanation). [Q70]
- Citrus fruits ki production **Mediterranean regions** mein well-developed hai (subtropical dry-summer climate region). [Q71]

High-Yielding Variety Seeds — Mexico (Norman Borlaug)

- American agronomist **Norman E. Borlaug** ne HYV seeds pehli baar **Mexico** mein develop kiye. [Q72]

Catechu — Khair Tree Wood

- Catechu **Khair tree (Acacia catechu)** ki wood se obtain hota hai. [Q73]

Peanuts/Groundnut — Main Crop aur Native Place

- Given options mein Peanuts/Groundnut **Gambia** ki main crop hai — currently Ghana in options mein leading producer hai; global FAO 2023 ke according **China largest producer** hai (excluding shelled). [Q74]
- Groundnut ka native place **Brazil (Mato Grosso aur nearby areas, South America)** maana jaata hai. [Q75]

Shahtoosh — Tibetan Antelope (Chiru) Wool

- 'Shahtoosh' (world ki most attractive, warmest, lightest wool) **Tibetan antelope (Chiru)** ke underfur se obtain hoti hai — mainly Tibetan Plateau/China mein milta hai, kuch Ladakh(India) mein bhi — CITES ke tehat protected species hai, international commercial trade prohibited hai. [Q76]

- Shahtoosh shawl **Tibetan Antelope (Chiru)** ke hairs se banti hai — master craftsmen weave karte hain, mainly China/Tibet/S.Xinjiang/W.Qinghai, kuch Ladakh(India) mein bhi. [Q77]

Apiculture, Viticulture, Olericulture — Terminology

- **Apiculture** = bees ka maintenance (beekeeping) — **Honey** production se related. [Q78]
- **Viticulture** = grapes production+study ki science hai (Latin 'vine' se) — vineyard events se deal karti hai, wine ke liye use hone par 'viniculture' bhi kehte hain — horticulture ki ek branch hai. [Q79]
- Given cultivation-nomenclature mismatches mein **Vegetable cultivation** ko '**Olericulture**' kehte hain, '**Horticulture**' **NAHI** — baaki correctly matched hain. [Q80]

Silk Production — China #1, India #2

- FAO 2023 ke according raw silk production mein India ka rank **2nd** hai (China ke baad). [Q81]
- FAO 2023 ke according world ka largest raw silk producer **China** hai. [Q82]

Australia — Cattle Rearing Mainly Meat ke liye

- Australia mein cattle rearing meat ke liye zyada hoti hai, milk ke liye kam (A **TRUE**) — 2025 mein ~30.1 million cattle the, jisme se sirf ~2.2 million dairy cattle the, baaki mainly beef ke liye — Australian log traditionally non-vegetarian hain (R **TRUE**, sahi explanation) — Australia world ke major beef exporters mein se ek hai. [Q83]

China — Largest Livestock Population

- FAO stats ke according (million): Brazil 272.69→304.15, **China 847.63→829.58 (largest)**, India 539.79→545.33, USA 182.53→201.69 (2007→2020) — given options mein **China** ki livestock population sabse zyada thi. [Q84]

Mad Cow Disease — Beef Image Destroyed

- Europe+America mein beef ki 'safe+healthy food' image **Mad Cow Disease** ne destroy ki — 1986 mein UK mein pehli baar outbreak hua, British beef industry badly affected hui, North America mein bhi similar incidents dekhe gaye. [Q85]

Milk — India World ka Leading Producer

- National Dairy Development Board (NDDB) ke according **India** world ka leading milk producer hai (247.87 million tonnes, 2024-25) — per capita availability ~485 g/day. World Food+Agriculture Statistical Yearbook 2025 (2023 data) ke according top milk-producing countries: India, USA, Pakistan, China, Brazil. [Q86, Q87, Q89]

Milk Production per Cow — Denmark Highest (Given Options)

- FAO 2020 data (Hectogram/Cow, given options mein): **Denmark 100,283 (highest)**, Netherlands 92,556, Great Britain 83,690, India 17,030. [Q88]

Corn — China 2nd Rank

- Given options mein Corn production mein **China 2nd rank** pe hai (FAO 2023 data ke according leading maize producers: USA, China, Brazil). [Q90]

'Sugar Bowl of World' — Cuba

- **Cuba** ko 'Sugar Bowl of World' kehte hain — sugarcane Cuba ka major produce hai, sugar processing ke liye use hota hai. [Q91]

Fazenda — Brazil ki Coffee Plantations

- **Fazenda** = Brazil ki large coffee plantations (SE Brazil mein) — colonial period (16th-19th century) mein Fazendas mainly northeastern region mein sugar production ke liye concentrated thi. [Q92]

Country — Principal Primary Export Matching

- Chad-Petroleum, Niger-Uranium, Rwanda-Coffee, Benin-Cotton. [Q93]

Rice — India Largest Exporter

- Pichhle 5 saal mein **India** world ka largest rice exporter raha hai — USDA 2026 projections: India ~24.5 million tonnes exports (~40% global trade), Vietnam 2nd largest exporter. [Q94]

Saffron — Iran Largest Producer

- 2025 ke according world ka largest saffron producer **Iran** hai. [Q95]

Economic Activity — Country Matching

- Commercial dairy farming-Denmark, Commercial grain farming-Argentina, Commercial plantation farming-Malaysia, Commercial fruits production-France. [Q96]

Cocoa — Top Producers (Cote d'Ivoire, Ghana)

- FAO 2024 ke according top 3 cocoa producers: **Cote d'Ivoire, Indonesia, Ghana** — Cameroon 6th major producer hai. Given options mein jo desh MAJOR producer NAHI hai wahi answer hai. [Q97]
- UPSC 2024 ke according world ke 2 largest cocoa producers: **Cote d'Ivoire aur Ghana**. [Q98]

India vs China — Arable Area Comparison

- FAOSTAT 2023 ke according: **India ~153.87 million hectares arable land, China ~109.02 million hectares** — India ka arable area China se zyada hai (Statement 1 TRUE). [Q99]

India — Cropland Area Highest (vs USA/China/Japan)

- FAO 2023 cropland area (million hectares): **India 168.32 (highest)**, USA 154.73, China 128.36, Japan 4.29 — India in charon countries mein sabse zyada cropland area rakhta hai; India tropical+subtropical zones dono mein hai, tropical monsoon location diversified cropping year-round enable karta hai. [Q100]

'Cereal Yield' — Production per Unit Area

- 'Cereal Yield' ka matlab **cereal crops ki production per unit area of harvested land** hai (kg/hectare mein express hota hai) — total country production ka matlab NAHI (Statement 1 correct, Statement 2 galat) — wheat, rice, maize, barley, oats, rye, millets, sorghum, buckwheat, mixed grains isme measure hote hain. [Q101]

Crop Rotation — Soil Nutrient Replenishment

- Alternate seasons mein different crops grow karna soil nutrients replenish karta hai (crop diversification/rotation) — same field mein few years ya 1-year interval baad crop dobara grow ho sakti hai (Assumption I implicit NAHI hai). [Q102]

Mediterranean Agriculture — Region Coverage

- Mediterranean climate ~30°-40°/45° latitude (dono taraf) mein hai, mainly continents ke western parts — Mediterranean Sea ke around: Spain, Portugal, France, S.Italy, Greece, W.Turkiye, Syria, W.Israel, N.Africa — given options mein jo area is list mein NAHI aata wahi answer hai. [Q103]
