

□ STONE AGE — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

📖 Topics in this chapter:

1. Stone Age Study — Archaeologists & Organisations
2. Three-Age System & Copper Age
3. Palaeolithic Age — Earliest Man in India
4. Mesolithic Age — Animal Domestication
5. Mesolithic Sites — Bone Tools, Ornaments & Burials
6. Neolithic Age — Agriculture & Cereals
7. Neolithic Sites — Burzahom (Kashmir Valley)
8. Neolithic Sites — Ash Mounds
9. Bhimbetka — Rock Paintings
10. Chalcolithic Age — Ahar / Banas Culture
11. Chalcolithic Sites — Navdatoli
12. Chalcolithic Burial Practices — Jorwe Culture (Maharashtra)
13. Pottery — Ochre-Coloured Pottery (OCP)
14. Megaliths
15. Important Match-the-Following (Period/Site & Site/State)
16. Important Site Pairs (True/False Statement Type)
17. Assertion-Reason: Vindhyas to Ganga Valley Migration

1. Stone Age Study — Archaeologists & Organisations

- Robert Bruce Foote Britannica ke mutabik ek British geologist AUR archaeologist dono the. Inhe Indian pre-history ka 'father' kaha jaata hai. Geological Survey of India (GSI) se jude the aur Stone Age ki antiquities document ki thi. (Isliye is question mein A aur B dono options correct maane jaate hain.) [Q1]
- Alexander Rea, A.H. Longhurst, Robert Sewell, James Burgess aur Walter Elliot — sab archaeological excavations se jude the, mainly South India ke history par kaam karte the. [Q3]
- Alexander Cunningham (1814-1893 AD) — 'Father of Indian Archaeology' kahe jaate hain. British army officer the, Bengal Engineer Group mein. [Q49]
- Archaeological Survey of India (ASI) — Ministry of Culture ke under aata hai. India ka premier archaeological research aur protection organization hai. [Q48]
- National Museum of Mankind (Indira Gandhi Rashtriya Manav Sangrahalaya) — Bhopal (M.P.) mein located hai, Ministry of Culture ke under ek autonomous organization hai, aur India ka sabse bada museum hai jo human development history dikhata hai. [Q50, Q51]

2. Three-Age System & Copper Age

- Copenhagen museum ke collection ke basis par Stone → Bronze → Iron wali 'three-age system' Christian Jurgensen Thomsen ne banayi thi. [Q2]
- Copper Age ko hi Chalcolithic Age kehte hain — jis period mein pathar ke saath copper tools bhi use hone lage. [Q22]

3. Palaeolithic Age — Earliest Man in India

- India mein man (insaan) ka sabse pehla evidence Narmada Valley, M.P. (Hathnora) mein mila hai — yahi India ka pehla human fossil bhi hai. Ise 1982 mein Arun Sonakia ne discover kiya tha. [Q11, Q12]

4. Mesolithic Age — Animal Domestication

- Excavated evidence ke hisab se animal domestication (janwaron ko paltu banana) Mesolithic period mein shuru hua. Sabse purane evidence Adamgarh (Narmadapuram, M.P.) aur Bagor (Bhilwara, Rajasthan) se mile hain — ye do site name saath mein yaad rakho. [Q4, Q5, Q21]

5. Mesolithic Sites — Bone Tools, Ornaments & Burials

- Mahadaha aur Sarai Nahar Rai (Pratapgarh dist., UP) — dono jagah se bade paimane par bone/horn (haddi/singh) ke implements aur ornaments mile hain. 'Puratatva Vimarsh' (Dr. Jai Narayan Pandey ki book) mein Sarai Nahar Rai ke bone ornaments ka zikr hai. [Q6, Q7]
- Damdama (Pratapgarh dist., UP) mein 41 human graves mili hain — 5 double burial, aur ek triple burial (3 skeleton ek hi grave mein) bhi yahin mila hai. Note: Sarai Nahar Rai mein 4-skeleton wali ek grave mili thi — dono sites confuse mat karna. [Q9]
- Lekhahia rock shelter (Vindhya region) se maximum human skeletons mile hain: 'Puratatva Vimarsh' (J.N. Pandey) ke hisab se 17 skeleton (shelter 1 se); John R. Lucas (University of Oregon, USA) ke hisab se 27 skeleton. [Q46]
- Mesolithic sites ka sahi west-to-east geographical order aata hai (jaise Mahadaha se shuru hoke Lekhahia tak) — is type ke questions mein site ki map-position yaad rakhna zaroori hai. [Q8]

6. Neolithic Age — Agriculture & Cereals

- Cereals (anaj) ki cultivation sabse pehle Neolithic Age mein shuru hui — yehi wo time hai jab log agriculture seekhe. Koldihwa aur Mehrgarh — dono Neolithic sites se rice bran aur wheat ke clear evidence mile hain. [Q10]
- Modern society mein khaye jaane wale 8 tarah ke anaj mein se Barley sabse pehla anaj tha jo cultivate hua. Baad mein usi area mein ~8000 B.C. ke aas-paas wheat bhi cultivate hone lagi. [Q13]
- Uttar Pradesh ko prehistoric time se hi rich cultural heritage mila hai — Lahuradev (Sant Kabir Nagar dist., UP) duniya bhar mein paddy (dhaan) cultivation ka sabse purana evidence deta hai, Koldihwa bhi isi tarah ka evidence deta hai. UP ke kai sites se barley/paddy jaise sabse purane anaj evidence mile hain. [Q19]

EXAM TRAP — Mehrgarh vs Lahuradeva (bahut important pattern!)

- ▶ Latest research ke hisab se, Indian sub-continent mein agriculture ka **SABSE PURANA** evidence Lahuradeva (Sant Kabir Nagar, UP) se mila hai. (Q14)
- ▶ Lekin agar kisi question ke **OPTIONS** mein 'Lahuradeva' hai hi nahi, to us case mein sahi answer

Mehrgarh (~7000 B.C.) ban jaata hai. (Q15, Q16, Q17, Q18)

- ▶ RULE: Pehle options dekho — Lahuradeva available hai to Lahuradeva sahi hai; nahi hai to Mehrgarh sahi hai.
- ▶ Settled (sthai) life ka bhi sabse purana evidence — diye gaye options mein Mehrgarh (Kachhi plains, Balochistan) hi hota hai. Kile Gul Muhammad (4000 B.C.) aur Kalibangan (3500 B.C.) — dono Mehrgarh se baad ke hain. (Q20)
- ▶ Mehrgarh se Stone Age se lekar Harappan Civilization tak ke continuous cultural remains bhi mile hain. (Q25)

7. Neolithic Sites — Burzahom (Kashmir Valley)

- Pit dwelling (zameen khodkar bane hue ghar) ka evidence Burzahom Neolithic site ki characteristic feature hai. [Q41]
- Burzahom ke kai pits mein dog aur antlered deer ki haddiyan human skeletons ke saath mili hain — human skeletons sitting position mein burial pits mein mile hain. Human body ke saath dog ko dafanane ka evidence sabse prominently yahin milta hai. [Q39, Q40]

8. Neolithic Sites — Ash Mounds

- 'Ash mounds' Neolithic site Sangana Kallu (Ballari dist., Karnataka) se mile hain — Piklihal aur Utnur mein bhi mile hain. Ye Neolithic herdsman community ke seasonal camps ke jale hue avshesh hain. [Q29]

9. Bhimbetka — Rock Paintings

- Bhimbetka ki rock shelters Abdullahganj-Raisen (Madhya Pradesh) mein located hain aur Rock Paintings ke liye famous hain. [Q30, Q31, Q32]
- Dr. Vishnu Shridhar Wakankar ne Bhimbetka ki rock shelters 1957-1958 mein discover ki thi. Ye ek UNESCO World Heritage Site hai. [Q34, Q35, Q36]
- India mein sabse zyada pictures Bhimbetka ki rock-shelters se mile hain — 750 rock shelters mein around 500 pictures hain. In caves mein Indian subcontinent par human life ke sabse purane traces milte hain. [Q33]

10. Chalcolithic Age — Ahar / Banas Culture

- Ahar civilization Chalcolithic period ki thi aur Rajasthan ke Mewar region mein phali-phuli. Ye log copper tools use karte the aur inhe rice (chawal) ke baare mein pata tha. Zyadatar black-red pottery mili hai jisme white geometric designs bane hain. [Q23]
- Ahar-Banas culture (2100-1500 B.C.) Harappan Civilization ke contemporary (samkalin) thi — Mewar region, Banas river aur uski tributaries ke aas-paas. Main sites: Ahar, Gilund, Balathal. [Q24]

11. Chalcolithic Sites — Navdatoli

- Navdatoli (M.P., Khargone ke pass) mein round aur rectangular — dono tarah ke residential structures ke bahut achhe evidence mile hain. Excavation H.D. Sankalia (Deccan College, Pune) ne kiya tha. Ye Indian subcontinent ka sabse zyada extensively excavated Chalcolithic site hai (1500 B.C. se 1300 B.C. ke beech ka). [Q26, Q27]

12. Chalcolithic Burial Practices — Jorwe Culture (Maharashtra)

- Maharashtra ki Jorwe culture (Chalcolithic period) ke log life-after-death mein believe karte the, isliye apne murdo ko ghar ke andar, floor ke niche hi dafanate the. Adults ko supine position (chit lete hue) mein rakha jaata tha, sar north ki taraf (North to South position). Bachchon ko urns (matke) mein bury kiya jaata tha. Ye sites Daimabad, Inamgaon, Chandoli, Nevasa mein mili hain. [Q38]

13. Pottery — Ochre-Coloured Pottery (OCP)

- Ochre-coloured Pottery (O.C.P.) ki discovery aur naam-karan (christening) B.B. Lal ne 1950-52 mein Hastinapur mein kiya tha. Naam se hi pata chalta hai — 'ochre' colour ki wajah se ye pottery pehli nazar mein badly-fired (kam pakayi hui) lagti hai. [Q37]

14. Megaliths

- Megaliths usually badi-badi pattharon se bane hue burial (dafan) sites hote hain, jo habitation area se door graveyards mein milte hain. Zyadatar burial ya post-burial rituals se related maane jaate hain. Types: Chamber tombs, Dolmens, Stone alignments waghera. [Q28]

15. Important Match-the-Following (Period/Site & Site/State)

- Period → Site match: Palaeolithic Age → Sohan/Soan River Valley | Mesolithic Age → Bhimbetka Caves | Neolithic Age → Burzahom | Chalcolithic Age → Banas Valley (Ahar-Banas culture). [Q42]
- Site → State match: Nevasa → Maharashtra | Isampur → Karnataka | Didwana → Rajasthan | Gudiya Cave → Tamil Nadu. [Q43]

16. Important Site Pairs (True/False Statement Type)

- Burzahom (Kashmir) — pit dwelling aur tool industry ke liye famous hai, rock-cut shrines ke liye NAHI (galat pair). Chandraketugarh (West Bengal) — terracotta craft ka bada centre hai (sahi pair). Ganeshwar (Jodhpura culture, Rajasthan) — sainkdo copper objects ke liye famous hai (sahi pair). [Q44]

- Chandraketugarh West Bengal mein hai, Odisha mein NAHI (galat). Inamgaon Maharashtra ka Chalcolithic site hai (sahi). Mangadu Kerala ka important Megalithic site hai jaha urn-burials milte hain (sahi). Salihundam (Andhra Pradesh) ek Buddhist stupa site hai, rock-cut cave shrines nahi hain (galat). [Q45]

17. Assertion–Reason: Vindhya to Ganga Valley Migration

- Stone age ke log Vindhya se Ganga Valley terminal Pleistocene period mein migrate hue the, kyunki climatic change ki wajah se Vindhya valley rehne layak nahi rahi thi. Isliye Assertion aur Reason — dono sahi hain aur Reason, Assertion ka sahi explanation deta hai. [Q47]
