

INDUS VALLEY CIVILIZATION — FULL MIND MAP

Topic-wise · Fully Explained · Hinglish · SSC / BPSC / BSSC / Railway

Topics in this chapter:

1. Introduction, Nomenclature & Nature of the Civilization
2. Sources of Knowledge & Theories of Origin
3. Discovery History — Key Archaeologists & Excavators
4. Extent, Boundaries & Rivers
5. Important Match-the-Following Sets (Site / Excavator / River / Finding)
6. Major Sites — Location & Regional Facts
7. Site Spotlight — Mohenjodaro
8. Site Spotlight — Lothal
9. Site Spotlight — Dholavira
10. Kalibangan & Banawali — Terracotta Finds
11. Town Planning, Architecture & Key Features
12. Economy — Metals, Trade & Agriculture
13. Pottery, Seals & Art
14. Religion & Beliefs
15. Burial Practices
16. Decline of the Indus Valley Civilization
17. Comparison with World Civilizations

1. Introduction, Nomenclature & Nature of the Civilization

- Human society mainly economy par depend karta hai — jaise-jaise economy badalti hai, samaj bhi usi hisaab se badalta hai. [Q1]
- Harappa ek archaeological site hai jo Indus Valley Civilization se related hai. Sabse pehla evidence Harappa se mila tha, isliye ise 'Harappa Civilization' bhi kehte hain. Ye Egypt aur Mesopotamia ke saath duniya ki 3 prachin civilizations mein se ek hai. [Q2]
- IVC ek 'Proto-historic' age ki civilization hai — likhna (script) toh aata tha, lekin wo script abhi tak decipher nahi ho paayi hai. [Q3]
- IVC ko 'Non-Aryan' isliye kaha jaata hai kyunki ye ek Urban (shehri) civilization thi, jabki Aryan civilization Rural (gramin) thi. [Q4]
- IVC ko Aryan civilization se pehle isliye maana jaata hai kyunki inki script aur town-planning zyada developed thi, aur excavation mein mili pottery bhi ye prove karti hai — IVC ki khaasiyat red pottery with black figures thi, jabki Aryans grey painted pottery use karte the. [Q5]
- IVC, Vedic culture se kai tarah se alag thi: IVC urban thi (Vedic rural), IVC ki script pictographic (chitra jaisi) thi, aur IVC logo ko iron ka pata nahi tha jabki Vedic log iron weapons use karte the. [Q6]
- IVC ek Bronze Age civilization thi — logo ko iron ka pata NAHI tha. Baaki sab sahi hai: advanced drainage system tha, trade-commerce (internal-external dono) advanced thi, aur log Mother Goddess ki pooja karte the. [Q27]

2. Sources of Knowledge & Theories of Origin

- Harappa mein sabse pehla artefact ek unique stone seal mila tha jisme unicorn aur ek inscription thi. Aisi hi seals poore region mein mili hain. Script abhi tak decipher nahi hui hai, isliye archaeological excavations hi Harappan culture ke baare mein jaanne ka mukhya source hain. [Q7, Q8]
- IVC ke logo ke baare mein jaanne ka mukhya source 'Seals' hain — 3000 se zyada seals mili hain jisme unki religious beliefs, script, aur jaane-pehchane janwar depict hote hain. Excavation yahan 1921 mein shuru hui thi. [Q9]
- Harappan civilization ki origin ko lekar alag-alag scholars ke views hain: D.H. Gordon aur Mortimer Wheeler ne kaha civilization ki idea Western Asia se migrate hui; Amalananda Ghosh ne kaha pre-Harappan culture hi matured hoke Harappan civilization bani. M. Rafique Mughal ne kaha ki development locally Ravi river (Harappa) ke region mein hi hua tha — unhone 'Mesopotamia se inspired' wali purani belief ko REJECT kiya tha (isliye 'Rafique Mughal = Mesopotamia se inspired' wala match GALAT hai, yehi is question ka answer hai). [Q10]

3. Discovery History — Key Archaeologists & Excavators

- Match yaad rakho: Harappa → Daya Ram Sahni (1923-25); Hastinapur → B.B. Lal (1950-52); Takshashila → John Marshall (1913-34); Kaushambi → N.G. Majumdar (1936-37). [Q11]
- Chanhudaro (Mohenjodaro se ~130 km south) ko N.G. Majumdar ne 1931 mein discover kiya tha, aur E.J.H. Mackay ne bade paimane par excavate kiya — yahan bead-making factory aur furnace mile hain. [Q39]
- Sir John Marshall, Archaeological Survey of India ke Director-General the (1902-1928). Unhone hi Dayaram Sahni ko appoint kiya jinhone 1921 mein Harappa excavate kiya, aur Rakhal Das Banerjee ne 1922 mein Mohenjodaro ke ruins khode. [Q58]
- IVC ki discovery se juday do Indian archaeologists: Rakhal Das Banerjee (Mohenjodaro, 1922) aur Dayaram Sahni (Harappa, 1921). [Q59]
- Sahi match: Harappa → Daya Ram Sahni, Lothal → S.R. Rao, Surkotada → J.P. Joshi. Lekin Dholavira ko B.K. Thapar ne NAHI, balki R.S. Bisht ne excavate kiya tha. [Q60]
- Alexander Cunningham (ASI ke head) ne Harappa site 1853 aur 1856 mein visit ki thi — chhote excavation kiye, purani pottery/tools/ek stone seal bhi mila, lekin iski massive civilization ki significance ko pehchaan NAHI paye. [Q61]
- 1921 mein Daya Ram Sahni ne Harappa excavate kiya (1926-27 se 1933-34 tak M.S. Vats bhi jude the). Mohenjodaro 1922 mein Rakhal Das Banerjee ne excavate kiya (K.N. Dixit, Ernest Mackay, Aurel Stein, A.N. Ghosh, J.P. Joshi bhi jude the). V.A. Smith Harappan discovery se JUDE NAHI the — wo ek Irish Indologist aur historian the. [Q62]
- 'Surkotada' (Gujarat ke Kachchh district mein) Jagatpati Joshi (J.P. Joshi) ne discover aur excavate kiya. [Q63]

4. Extent, Boundaries & Rivers

- Harappa culture ki Eastern boundary: Alamgirpur (Meerut, UP). Western boundary: Sutkagendor (Balochistan, Pakistan). Northern boundary: Manda (J&K). Southern boundary: Daimabad (Maharashtra). [Q34]

- IVC geographically Jhelum river se lekar Hindon river (Yamuna ki tributary, Alamgirpur ke paas) tak phaili thi. Rivers involved the: Sindhu (Indus), Chenab, Ravi, Sutlej, Jhelum — Ganga river IVC ka hissa NAHI thi. [Q55]

5. Important Match-the-Following Sets (Site / Excavator / River / Finding)

- Site–Finding match: Lothal → Dockyard; Kalibangan → Ploughed field; Dholavira → 10-signs wali Harappan script inscription; Banawali → Terracotta plough replica. [Q17]
- Site–Finding match: Harappa → Cemetery R-37; Lothal → Dockyard; Kalibangan → Furrowed land; Mohenjo-Daro → Dancing Girl Statue. [Q20]
- Site–River match: Harappa → Ravi; Hastinapur → Ganga; Nagarjuna Konda → Krishna; Paithan → Godavari. [Q21]
- Site–River match: Harappa → Ravi; Kalibangan → Ghaggar; Lothal → Bhogava; Ropar → Sutlej. [Q22]
- Site–Location match: Manda → Jammu & Kashmir; Daimabad → Maharashtra; Kalibangan → Rajasthan; Rakhigarhi → Haryana. [Q35]
- Site–Location match: Balu → Haryana; Manda → Jammu & Kashmir; Padri → Gujarat; Hulas → Uttar Pradesh. [Q36]

6. Major Sites — Location & Regional Facts

- Punjab (Pakistan): Harappa, Ravi river ke kinare. [Q23]
- Sindh (Pakistan): Mohenjodaro (Larkana dist, Indus river ke right bank par) aur Chanhudaro dono Sindh mein hain. Surkotada Gujarat (India) mein hai, Sindh mein NAHI. [Q37, Q38]
- Rajasthan: Kalibangan (Hanumangarh dist, Haryana mein NAHI — ye ek common trap hai) — yahan ploughed field ke furrows mile hain. Ise Luigi Pio Tessitore (Italian Indologist) ne discover kiya tha, aur A. Ghosh ne 1950-52 mein excavate kiya. [Q18, Q19, Q30]
- Gujarat: Lothal (Ahmedabad dist, Saragwala village ke paas, Dholka Taluka, Bhogava river ke kinare — S.R. Rao ne 1954 mein discover kiya) aur Dholavira (Kutch district) — dono Gujarat mein hain, aur Lothal hi Gujarat ka main Harappan site hai. Rangpur bhi Gujarat ke Saurashtra region mein hai (Arabian sea coast) jaha log Rice, Bajra aur Sorghum ugate the. [Q32, Q41, Q43, Q44, Q45, Q73]
- Haryana: Rakhigarhi (Hisar dist, Ghaggar river ke kinare) — India ka SABSE BADA Harappan site hai (Dholavira 2nd sabse bada hai). Banawali (Fatehabad dist) bhi Ghaggar valley mein hai. Rakhigarhi Rajasthan mein NAHI, Haryana mein hai. [Q33, Q53, Q54, Q69]
- Uttar Pradesh: Alamgirpur (Meerut) aur Hulas (Saharanpur) — dono UP mein IVC se related centres hain (Kalibangan Rajasthan mein hai aur Lothal Gujarat mein hai, ye dono UP mein NAHI hain). Mandi (Muzaffarnagar dist) bhi UP mein hai — yahan 2000 mein villagers ne ek ancient treasure trove khoja tha jo late Harappan period ka tha. [Q31, Q80]
- Patliputra (modern Patna ke paas) IVC se JUDA NAHI hai — Kalibangan, Ropar aur Lothal IVC se related hain. [Q52]

- Sohgauna (Gorakhpur dist, UP, Rapti river ke kinare) ek Harappan site NAHI hai — yahan Mauryan period ka copper-plate inscription mila hai. Chanhudaro, Kot Diji aur Desalpur — ye teeno Harappan sites hain (Chanhudaro & Kot Diji Sindh, Pakistan mein; Desalpur Kachchh, Gujarat mein). [Q16]
- Harappa Pakistan mein hai (Punjab province, ab Sahiwal dist), Ravi river ke kinare. Kalibangan Rajasthan mein, Lothal Gujarat mein, aur Alamgirpur UP mein hai. [Q40]
- Dadheri (Kotla Dadheri) — ek late Harappan site hai, Govindgarh, Fatehgarh Sahib district, Punjab (India) mein. Ye apni Painted Grey Ware culture ke liye jaana jaata hai, jo Aryans ke aane se associated maana jaata hai. [Q42]

7. Site Spotlight — Mohenjodaro

- 'The Great Bath' — IVC ki ek famous structure — Mohenjodaro (Sindh, Pakistan) mein mila tha. [Q24, Q25]
- Mohenjodaro se ek seal mili hai jisme boat ka model bana hua hai (Lothal se bhi clay model boats mile hain). [Q26]
- Mohenjodaro se hi famous 'humped bull seal' mila hai — yahan se sculptures, seals, pottery, gold-jewellery bhi mile hain. [Q84]

8. Site Spotlight — Lothal

- Lothal IVC ka ekmatra jagah hai jaha se port/dockyard ke concrete evidence mile hain (city ke east side mein). [Q46, Q47]
- Lothal, Gulf of Khambhat ke kinare situated ek important trading port thi — Western Asia ke saath trade karti thi. [Q48]
- Lothal se hi ek ivory scale (haathi-daant ka scale) mila hai. [Q67]

9. Site Spotlight — Dholavira

- Dholavira (Kachchh, Gujarat), India ka 2nd sabse bada Harappan site hai (Rakhigarhi sabse bada hai). Rock-cut architecture yahi se mili hai — R.S. Bisht aur unki team ne 1992 mein excavate kiya tha. [Q72]
- Dholavira, baaki Harappan cities se alag hai — ye teen parts (Citadel, Middle Town, Lower Town) mein baata gaya tha, jabki baaki cities generally do parts mein hoti thi. [Q74, Q75]
- Dholavira apne elaborate water-harvesting system ke liye famous hai — dams aur connected reservoirs banaye gaye the. Ek rock-cut reservoir mila hai jo 79m x 12m aur 7 meter gehra tha. [Q76, Q77]

10. Kalibangan & Banawali — Terracotta Finds

- ⚠ Disputed/Debated: Terracotta plough replica ASI ke mutabik Kalibangan (Rajasthan) ke early phase se mila hai, lekin Banawali (Fatehabad dist, Haryana) se bhi terracotta plough mila hai — isliye ye question dono answers (Kalibangan aur Banawali) accept karta hai. [Q50, Q51]

- Kalibangan se fire-altars (mud-brick platforms par) mile hain. Ek triangular terracotta cake mili hai jisme ek taraf horned deity (singhon wala devta) aur dusri taraf ek insaan bakri ko rassi se khinchte hue dikhaya gaya hai. [Q90]

11. Town Planning, Architecture & Key Features

- Bricks: IVC mein baked aur raw dono tarah ki bricks use hoti thi, ratio generally 4:2:1 tha (Kalibangan se ornamental bricks aur curved bricks bhi mili hain). Zyadatar ghar one-storey the, lekin kuch do-storey bhi the (staircase evidence mila hai). Roads generally 10 meter chaudi hoti thi. [Q28]
- Town planning IVC ki unique khaasiyat thi — cities/towns bahut ache se planned the. Harappa aur Mohenjodaro do major cities the. Kalibangan se ploughed field ka pehla evidence mila, aur Lothal se business/industrialization ka evidence mila. [Q29]
- IVC ki sabse significant features: burnt bricks ka use (Harappa/Mohenjodaro mein bahut zyada), well-planned architecture, aur advanced trade-commerce — isliye is type ke question mein 'more than one option sahi hai' wala answer sahi hota hai. [Q49]
- Wells aur bathrooms ka evidence lagbhag har major city (Mohenjodaro, Kalibangan, Harappa) ke har ghar mein mila hai — isliye ek specific site batana mushkil/disputed hai, halaki Mohenjodaro is feature ke liye sabse zyada famous hai. [Q64]
- Statements check: Harappa, Mohenjodaro, Ropar, Lothal, Kalibangan — IVC ke main sites hain (sahi). Cities grid-pattern mein design ki gayi thi, drainage system roads ke saath tha jo bade pattharon/bricks se covered tha (sahi). Log copper, bronze, gold, silver jaante the, sirf iron nahi jaante the. [Q70]

12. Economy — Metals, Trade & Agriculture

- Silver ka sabse purana evidence India mein Harappan culture se milta hai — Mohenjodaro aur Harappa se proper use ka evidence mila hai. Ye log Rajasthan ki Zawar aur Ajmer mines se silver lete the. [Q12]
- Chronological order (jis tarah appear hue): Urban culture/Harappan Civilization (Bronze Age, town-planning ke liye famous) sabse pehle → Iron plough (post-Vedic period, ~1000 B.C.) → Punch-marked silver coins (7th-6th century B.C.) → Gold coins (Indo-Greek rulers, 2nd century B.C.). [Q65]
- Insaan ne sabse pehla metal Copper use kiya tha (halaki duniya bhar mein iska exact time period alag-alag raha hai). [Q66]
- Harappan sites se gold, silver, copper aur brass ke evidence mile hain — sirf Iron ka evidence NAHI mila. India mein Iron Age ki shuruaat later Vedic period (~1000 B.C.) se maani jaati hai. [Q68]
- Cotton cultivation sabse pehle India mein hui thi (Mohenjodaro excavation se evidence mila) — India se ye Greece pahunchi jaha ise 'Sindon' kaha jaata tha. India mein cotton cultivation 3000 B.C. mein shuru hui, jabki Egypt mein 2500 B.C. mein. [Q81]
- IVC ek secular civilization maani jaati hai jisme koi ek organized/theocratic religion society par dominant nahi thi (sahi). Cotton textiles bhi banaye jaate the — Mohenjodaro se woven cotton ka evidence mila hai (sahi). [Q83]

13. Pottery, Seals & Art

- Harappan pottery zyadatar bright ya dark red rang ki hoti thi, achi tarah baked. Painting ke liye red-black colors use hote the (light black, chocolate, ya light red — buff/greenish-buff background par). [Q13]
- Harappan seals aur terracotta art mein Elephant, Rhinoceros, Tiger, Deer, Sheep jaise janwar depict hote the, lekin Cow (gaay) depict NAHI hoti thi. [Q15]
- Zyadatar Indus seals steatite (ek naram patthar) se bani thi. Pipal tree (peepal ka ped) inn seals par bahut baar depict hui hai — isse pata chalta hai ki IVC logo ke liye Pipal ka sacred/important value tha. [Q85]
- Seals par Horse depict NAHI hota — halaki Surkotada se ghode ki haddiyon ka evidence mila hai. Sabse common figure 'one-horned animal' (unicorn jaisa) tha, iske alawa Buffalo, Tiger, Rhinoceros bhi milte hain. [Q86]
- Excavation mein Lion (sher) ke hone ka koi evidence NAHI mila — Cow aur Elephant ke evidence mile hain, aur Horse ko lekar kuch dispute hai. [Q87]
- ⚠️ Note: BPSC ne officially (B) Horse ko is question ka sahi jawab maana hai — halaki recent excavations mein Surkotada se ghode ki haddiyan mili hain, lekin Horse ka IVC life mein koi major role nahi tha, isliye exam ke hisaab se Horse ko 'not known' maana gaya. [Q88]

14. Religion & Beliefs

- Idol worship (murti pooja) ki shuruaat Pre-Aryan period (yaani Indus Valley Civilization) mein maani jaati hai — Mohenjodaro se mile coins mein God ki seal dikhti hai, jisse lagta hai ki ye log Mother Goddess ki pooja karte the. [Q14]
- ⚠️ Disputed: IVC ki script abhi tak decipher nahi hui, isliye religion ko lekar sirf speculations hain. Log shayad Mother Goddess aur Lord Shiva ki pooja karte the, Yagya/sacrificial rituals bhi karte the (Rajasthan-Gujarat sites mein fire-pits mile hain), aur burial rituals se pata chalta hai ki wo Atma/spirit mein believe karte the. [Q56]
- John Marshall ne excavation mein ek figure ko Lord Shiva (ya Rudra) / Pashupati (janwaron ke bhagwan) ke roop mein identify kiya tha. 'Pashupati seal' mein ek 3-mukh wale purush God ko yogic posture mein baitha hua, janwaron se ghira hua dikhaya gaya hai — isi se historians maante hain ki log Shiva ki pooja karte the. [Q57]
- Ab tak excavation mein koi bhi temple ya pooja ki jagah NAHI mili hai. Statues aur seals se pata chalta hai ki female deities (Mother Goddess) aur male deities (Shiva/Pashupati) dono ki pooja hoti thi (sahi). Horse-drawn chariots use karne ka koi concrete evidence nahi hai — ye feature Aryans se associate kiya jaata hai. [Q82]

15. Burial Practices

- ⚠️ Disputed: Double burial ka evidence Lothal (3 double burials mile hain) ke alawa Kalibangan aur Rakhigarhi se bhi mila hai — isliye is question ke multiple options sahi maane ja sakte hain. [Q78]
- Sinauli/Sonauli (Baghpat dist, UP) ke recent excavation mein 125 graves mili hain jo IVC se related hain — ye graves North-South direction mein hain aur zyadatar primary human burials hain, kuch ke saath janwaron ki haddiyan aur gold/copper ke saman bhi mile hain. [Q79]

16. Decline of the Indus Valley Civilization

- Assertion-Reason: Mohenjodaro aur Harappa aaj 'dead' (extinct) cities hain — ye sahi hai. Inki khoj excavations ke dauran hui thi — ye bhi sahi hai. Lekin excavation mein discover hona hi in shehron ke khatam hone ka reason NAHI hai — asli reason climatic changes, tectonic activities waghera the. Isliye dono statements sahi hain lekin Reason, Assertion ka sahi explanation NAHI deta. [Q71]
- IIT Kharagpur ki report ke mutabik, lagatar 900 saal tak kam ya na-ke-barabar baarish (drought) hone ki wajah se IVC ka pathan/decline hua tha. [Q89]

17. Comparison with World Civilizations

- Egyptian Civilization, Nile river ke kinare ~3000 saal tak phali-phuli. Nile ko Egypt ki 'lifeline' kaha jaata hai — ye duniya ki sabse lambi north-flowing river hai. IVC (India) aur Mesopotamia (Iraq) contemporary (samkalin) civilizations thi. [Q91]
- North se South ki taraf civilizations ka sahi order: Aztec → Maya → Muisca → Inca. Aztec North Mesoamerica (Central Mexico) mein, Maya South Mesoamerica (Belize, Guatemala) mein, Muisca East Colombia (South America) mein, aur Inca West South America (Ecuador se Santiago tak) mein phali-phuli. [Q92]
- Mesopotamia (Iraq) civilization ko duniya ki sabse purani civilization maana jaata hai — ye Tigris aur Euphrates river ke beech develop hui thi. Egyptian civilization Nile basin mein develop hui aur Mesopotamian civilization ke baad aayi maani jaati hai. [Q93]
- Sumerian Civilization (Mesopotamia ka hissa) ke log duniya mein sabse pehle proper likhne ki kala (writing system) develop karne wale the — unki Cuneiform script duniya ki sabse purani writing systems mein se ek maani jaati hai. [Q94]
