

FUNGAL DISEASES — FULL MIND MAP

Biology Ch. 9.iii · Diseases & Treatment · Hinglish · SSC / BPSC / BSSC / Railway

Topics in this sub-chapter:

1. Mucormycosis — Black Fungus & Zoonotic Disease
2. Ergotism — Contaminated Grains
3. Athlete's Foot — Tinea Pedis
4. Fungal Skin Disorders — Dermatitis & Baldness
5. Aflatoxin — Aspergillus, Penicillium & Liver

1. Mucormycosis — Black Fungus & Zoonotic Disease

- Zoonotic disease wo infectious disease hoti hai jo pathogen ke through animal se human mein jump karti hai. Source mein Rabies, Plague aur SARS zoonotic diye gaye hain, jabki Mucormycosis zoonotic nahi hai. [Q1]
- Mucormycosis (pehle zygomycosis) serious but rare fungal infection hai jo mucormycetes group ke molds se hota hai; ise Black Fungus bhi kaha gaya hai. Ye molds environment mein widely present hote hain. [Q1]
- Source ke mutabik Mucormycosis mainly un logon ko affect karta hai jinki disease-fighting capacity health problems ya medicines ki wajah se kam ho. Commonly nose, sinuses, eye aur brain affect ho sakte hain; lungs, stomach-intestines aur skin bhi involve ho sakte hain. [Q1]

2. Ergotism — Contaminated Grains

- Ergotism contaminated grains ke consumption se hota hai. Source ise long-term ergot poisoning batata hai jo Claviceps purpurea fungus ke alkaloids ke ingestion se linked hai; ye fungus rye aur other cereals ko infect karta hai. [Q2]

3. Athlete's Foot — Tinea Pedis

- Athlete's Foot (Tinea pedis) fungal disease hai. Source Trichophyton, Epidermophyton aur Microsporum ki species ko causative fungi ke examples deta hai. Infection generally toes ke beech hota hai. [Q3]
- Statement-based question mein Femur longest human bone aur Cholera bacterial disease—dono correct hain; 'Athlete's foot virus se hota hai' statement incorrect hai because source ise fungal infection batata hai. Isliye statements 1 & 2 correct hain. [Q4]

4. Fungal Skin Disorders — Dermatitis & Baldness

- Source ke according Seborrheic dermatitis fungi se caused disease hai aur scalp, face aur torso ko affect karne wala inflammatory skin disorder hai. Polio viral aur Cholera bacterial disease diye gaye hain. [Q5]

EXAM TRAP — Source-Specific Answer — Baldness

- ▶ Q6 mein source ka marked answer 'Baldness' hai aur explanation ise fungal disease ke roop mein state karta hai; isi source framing ko mind map mein preserve kiya gaya hai. AIDS ko HIV infection aur Colour blindness ko genetic disorder bataya gaya hai. [Q6]

5. Aflatoxin — Aspergillus, Penicillium & Liver

- Aflatoxin food adulterant/toxin ka major target organ source mein Liver diya gaya hai. Aspergillus aur Penicillium ki kuch fungal species aflatoxins produce karti hain jo food ko toxic bana sakte hain. [Q7]
