

ENVIRONMENT IMPORTANT FACTS FOR EXAMS - FULL MIND MAP

Topic-wise | Hinglish | SSC / BPSC / BSSC / Railway

Topics in this chapter:

1. Climate & Natural Vegetation
2. Ecomark - Eco Labelling in India
3. Books, Thinkers & Environmental Ideas
4. Urbanisation, Development & Smart Cities
5. Green Programmes & Environmental Cases
6. Greenwashing & Greenhouse Farming
7. Greendex & World Environment Day
8. Climate-smart & Conservation Agriculture
9. Natural Capital

● ENVIRONMENT - IMPORTANT FACTS FOR EXAMS - FULL MIND MAP

1. Climate & Natural Vegetation

- Natural vegetation climate ka true index maana ja sakta hai, kyunki plant-community distribution temperature aur moisture jaise long-term climate factors se strongly influenced hoti hai. Water-loving plants moist/waterlogged conditions mein milte hain; Assertion aur Reason dono true aur R, A ko explain karta hai. [Q1]

2. Ecomark - Eco Labelling in India

- ECOMARK India ka eco-labelling mark hai, environment-friendly/specified environmental criteria meet karne wale consumer products ke liye. Iska purpose consumers ko lower environmental impact wale products identify karne mein help karna hai. Original scheme 1991 ki thi; source current note ke mutabik Ecomark Rules, 2024 ne old notification replace ki. [Q2, Q3, Q4]

3. Books, Thinkers & Environmental Ideas

- 1962 ki environmental classic Silent Spring American biologist/ecologist Rachel Carson ne likhi; is book ne global environmental movement ka tone set karne mein major role play kiya. [Q5]
- Green Development: Environment and Sustainability in the Third World ke author W. M. (William) Adams hain; first edition 1990. [Q7]
- Modern natural farming se widely associated pioneer Masanobu Fukuoka hain. Unka approach minimal intervention, no tillage, no chemical fertilizers/pesticides aur reduced weeding se associated hai; The One-Straw Revolution se ideas famous hue. [Q8]
- The Limits to Growth study/report Club of Rome ne commission kiya (1972); MIT team Dennis Meadows-led thi. Listed body ke context mein Club of Rome correct association hai. [Q18]

4. Urbanisation, Development & Smart Cities

- Unplanned/excessive urbanisation aur industrialisation unequal development, land-water-housing-public services par pressure, air/water/soil pollution, ecological degradation aur biodiversity loss tak lead kar sakte hain - isliye listed sab effects possible hain. [Q6]
- Mid-1980s development-debate mein resource degradation, environmental pollution aur displacement/rehabilitation major negative aspects the; Politics and Development broader field tha, specific negative-impact category nahi. [Q10]
- Census 2011 context mein India ~31.2% urban tha, isliye 'India over-urbanised country hai' assertion false maana gaya; lekin large cities mein infrastructure/service gaps significant hain, isliye Reason true. [Q21]
- Smart Cities Mission ka aim core infrastructure, decent quality of life, clean/sustainable environment aur smart solutions hai; governance/e-governance aur urban mobility bhi core elements. 'Stabilizing quality of life' mission objective nahi, quality of life improve/provide karna objective hai. [Q23]

5. Green Programmes & Environmental Cases

- Australia ka Green Army Programme young people ko vegetation restoration, habitat protection, wetlands improvement aur local conservation projects mein engage karta tha; programme 30 June 2018 ko cease hua. [Q9]
- Plachimada Palakkad district, Kerala mein hai. Source explanation Coca-Cola plant se groundwater over-extraction aur sludge disposal ko environmental degradation, water availability, soil, agriculture aur local health impacts se link karta hai. [Q11]

6. Greenwashing & Greenhouse Farming

- Greenwashing = false, misleading, vague, exaggerated ya insufficiently substantiated environmental claims karke product/service/company ko actual se zyada eco-friendly dikhana. Environmental claims truthful, specific aur credible evidence-backed hone chahiye. [Q12, Q13]
- Early-2000s historical current-affairs context mein question ne recently launched greenhouse farming ko Punjab se identify kiya. 'Recently' ko original question-period ke relative read karna hai, present ke relative nahi. [Q14]

7. Greendex & World Environment Day

- Greendex National Geographic + GlobeScan ka index tha jo countries mein environmentally sustainable consumer behaviour compare karta tha - housing, transport, food, goods etc. Greendex 2009 mein Indian consumers 17 countries mein first, score 59.5. [Q15]
- World Environment Day = 5 June, UNEP-led observance since 1973. Dono repeated questions ka same answer 5 June hai. [Q16, Q17]

8. Climate-smart & Conservation Agriculture

- GACSA Paris 2015 ka outcome nahi tha; ye 23 September 2014 UN Secretary-General Climate Summit, New York ke time launch hua. Membership voluntary hai, binding obligations create nahi karti; source India ko instrumental creator claim support nahi karta. Isliye only statement 2 correct. [Q19]
- FAO Conservation Agriculture ke 3 core principles: minimum mechanical soil disturbance + permanent organic soil cover + crop-species diversification/rotations. Given statements mein 2, 4 aur 5 fit karte hain; blanket ban on monoculture ya plantation crops defining requirements nahi. [Q20]

9. Natural Capital

- Natural capital = renewable/non-renewable natural resources ka stock: forests, water, soils, minerals, biodiversity etc. Roads human-made infrastructure/produced capital hain, natural capital nahi. [Q22]
