

EFFECTS OF OZONE LAYER DEPLETION - FULL MIND MAP

Topic-wise | Hinglish | SSC / BPSC / BSSC / Railway

Topics in this chapter:

1. Health Effects of Harmful UV Radiation
2. Why Stratospheric Ozone Is Essential
3. Discovery of the Antarctic Ozone Hole

1. Health Effects of Harmful UV Radiation

- Skin cancer - Sun ke UV radiation, visheshakar UV-B, ka bahut zyada sanpark DNA ko damage pahunchata hai aur tvacha kainsar ka jokhim badhata hai. ozone layer ke kshay se Earth ki surface tak zyada UV-B pahunch sakta hai. [Q1]

2. Why Stratospheric Ozone Is Essential

- stratospheric ozone Sun ke UV-C radiation ko puri tarah aur zyadatar UV-B radiation ko absorbed kar life ki protection karti hai. yahi surakshatmak bhumika batati hai ki Earth ki surface par harmful UV sanpark ko kam karne ke liye stratospheric ozone kyon zaroori hai. yeh statement stratospheric ozone ke bare mein hai; dharataliy ozone air pollutant hai aur health ko damage pahuncha sakti hai. [Q2]

3. Discovery of the Antarctic Ozone Hole

- British Team - british Antarctic sarvekshan (British Antarctic Survey) ke scientific jo pharman (Joe Farman), brayan gardinar (Brian Gardiner) aur jonathan shainkalin (Jonathan Shanklin) ne 1985 mein 'nechar' patrika mein Antarctic ozone-chhidr ki report prakashit ki. haili research centre (Halley Research Station) ke dirghakalik mapon ne Antarctica ke upar vasant ritu mein total ozone mein strong giravat dikhai. [Q3]
