

POLLUTION AND ITS TYPES - FULL MIND MAP

Topic-wise | Hinglish | SSC / BPSC / BSSC / Railway

Topics in this chapter:

1. Anthropogenic Pollution & Human-modified Environment
2. Biodegradable vs Non-biodegradable Pollutants

1. Anthropogenic Pollution & Human-modified Environment

- Anthropogenic - pollution aam taur par soil, water aur air ki physical, chemical aur biotic features mein apratyashit change ke is wajah se hota hai. yeh pollutants ke asamanupati sanchay ke reason hota hai. [Q1]
- Anthropogenic environment - human activities dwara convert environment ko 'enthropojenik environment' kaha jata hai. scientific 'enthropojenik' term ka use un environmental parivartanon ke liye karte hain jo direct ya apratyaksh roop se manushyon dwara paida ya prabhavit hote hain. [Q2]

2. Biodegradable vs Non-biodegradable Pollutants

- Sewage - ve pollutant jo samay ke saath nature mein microbes, jaise kuchh jivanuon, ki kriya dwara saral aur hanirahit substances mein tut sakte hain, jaivaapaghataniy pollutant kehlate hain. gharelu waste (kachara), mutr, mal, sivej, animal gobar, animals ki haddiyan aadi jaivaapaghataniy pollutant hain. [Q3]
- Sewage - ve pollutant jo samay ke saath nature mein microbes, jaise kuchh jivanuon, ki kriya dwara saral aur hanirahit substances mein tut sakte hain, jaivaapaghataniy pollutant kehlate hain. gharelu waste (kachara), mutr, sivej, agriculture avashesh, animal gobar, animals ki haddiyan aur vegetation substance jaivaapaghataniy pollutant hain. isliye (a) sahi jawab hai. [Q4]
- Rubber - aisa substance jise jivanu ya dusre living organism vighatit kar sakte hain aur is type pollution se bachav hota hai, jaivaapaghataniy kahalata hai. diye gaye options mein rabar jaivaapaghataniy hai. [Q5]
- Galat kathan: Pesticide; jaivaapaghataniy pollutant kachare ka woh roop hai jise dusre living organism vighatit kar sakte hain. yeh mainly plants ya animal sources se ata hai. [Q6]
