

RADIOACTIVE AND OTHER GASEOUS POLLUTION - FULL MIND MAP

Topic-wise | Hinglish | SSC / BPSC / BSSC / Railway

Topics in this chapter:

1. Bhopal Gas Tragedy & Methyl Isocyanate (MIC)
2. Chernobyl, Radioactive Pollution & Thermal Pollution

1. Bhopal Gas Tragedy & Methyl Isocyanate (MIC)

- December 3, 1984 - bhopal disaster, jise bhopal gas trasadi bhi kaha jata hai, India mein gas risav ki ghatana (Incident) tha jise world ki sabse kharab industrial disaster mana jata hai. yeh 2-3 December, 1984 ko bhopal, Madhya Pradesh mein yuniyan karbaid india limited (Union Carbide India Limited) ke kitanashak sanyantr mein hua. [Q1]
- 2 December 1984 ki rat bhopal, Madhya Pradesh mein ab tak ki sabse badi industrial apadaon (Disasters) mein se ek shuru hui. nikatavarti yuniyan karbaid (Union Carbide) kitanashak sanyantr se harmful mithail aisosainet (MIC) gas risav hone lagi, jisse bhopal gas trasadi hui, jismein praranbhik kuchh dinon mein anumanatah lagbhag (Approx) 3,000 log mare gae. [Q2]
- Methyl isocyanate - 2 December 1984 ki rat bhopal, Madhya Pradesh mein ab tak ki sabse badi industrial apadaon (Disasters) mein se ek shuru hui. nikatavarti yuniyan karbaid (Union Carbide) kitanashak sanyantr se harmful mithail aisosainet (MIC) gas risav hone lagi, jisse bhopal gas trasadi hui, jismein praranbhik kuchh dinon mein anumanatah lagbhag (Approx) 3,000 log mare gae. [Q3]
- Methyl Isocynate - 2-3 December 1984 ki rat yuniyan karbaid india limited (Union Carbide India Ltd. - UCIL) ki kitanashak karakhane se nikala chemical mithail aisosainet (MIC) bhopal shahar ko ek large gas kaksh mein badal gaya. yeh India ki pehli badi industrial disaster thi. [Q4]
- M.I.C. - 2-3 December 1984 ki rat yuniyan karbaid india limited (Union Carbide India Ltd. - UCIL) ki kitanashak karakhane se nikala chemical mithail aisosainet (MIC) bhopal shahar ko ek large gas kaksh mein badal gaya. yeh India ki pehli badi industrial disaster thi. [Q5]
- Methyl isocyanate - 2-3 December 1984 ki rat yuniyan karbaid india limited (Union Carbide India Ltd. - UCIL) ki kitanashak karakhane se nikala chemical mithail aisosainet (MIC) bhopal shahar ko ek large gas kaksh mein badal gaya. yeh India ki pehli badi industrial disaster thi. [Q6]

2. Chernobyl, Radioactive Pollution & Thermal Pollution

- Nuclear accident - chernobil (Chernobyl) disaster ek atoms durghatana thi jo 26 aprail, 1986 ko yukren (Ukraine, tatkalin USSR) mein hui. ghatak radioactive effect ke reason anek logon ki mrityu hui. [Q7]
- 1, 3 and 4 - radioactive pollution DNA ko damage pahunchakar organisms mein vanshanugat change paida kar sakta hai, isliye statement 1 sahi hai. yeh rakt-sanchar mein bhi badha dal sakta hai, isliye statement 3 sahi hai. yeh kainsarajanan (carcinogenesis) ka recognition-obtained reason hai, isliye statement 4 sahi hai. yeh soil mein different khanijon ke beech common imbalance paida nahi karta, isliye statement 2 galat hai. [Q8]
- Thermal Pollution - electricity sanyantr waste heat hatane ke liye shitalan systems ka use karte hain. agar garam shitalak water river, lake ya coastal water mein chhoda jae to obtained water-nikay ka temperature badh sakta hai. [Q9]
